AMY

American Manganese

Our new sponsor is a critical metals and technology driven company, focused on lithium-ion recycling using its RecycLiCo™ Patented Process.

Happy New Year!

As 2022 begins we all can reflect on how our 2021 trading went and set some goals for this year. What would be good goals to set?

Several things come to mind:

- 1) Make more \$\$ than the previous year.
- 2) Have a solid set of investing rules and follow them!
- 3) Make better investment selections by doing proper due diligence and not just following tips on the internet.
- 4) Invest in companies with solid management, solid projects in politicaly stable countries, and with the ability to raise significant \$\$ to fund those projects.
- 5) When things don't go as planned, cut your losses more quickly.

We hope you have a very successful 2022!

12-14-21 PROACTIVE INTERVIEW

12-31-21 HowStreet Interview

ur featured company is a is a critical metal company focused on the recycling of lithium-ion batteries using their RecycLiCo™ Patented Process. The process offers a closed-loop and environmentally friendly hydrometallurgical solution for the recycling of cathode materials from spent lithium-ion batteries and battery manufacturing scrap. The Company achieves high recovery and purity of materials such as lithium, cobalt, nickel, manganese, and aluminum from cathode chemistries such as NCA (lithium nickel cobalt aluminum oxide), NMC (lithium nickel manganese cobalt oxide), LCO (lithium cobalt oxide), and LMO (lithium manganese oxide). The RecycLiCo™ patented process aims to produce materials as high-quality cathode precursor, that could be directly integrated into the remanufacturing of battery cathodes using minimal processing steps.

Patented Technology & Publications

- The Company holds patents in Canada, US, China and South Africa for production of electrolytic manganese metals from low-grade manganese deposits
- Publication in the peer-reviewed
 Journal of the Electrochemical Society
 – Experimental Study on Recycling of
 Spent Lithium-Ion Battery Cathode
 Materials

Strong Market Fundamentals

- Closed-loop and sustainable lithium-ion battery recycling process
- Low operating cost (estimated reagent consumption cost of \$1/kg of cathode material processed)
- Low energy consumption & no high heat
- No landfill waste or toxic fumes
- High extraction and purity potential of lithium, nickel, cobalt, manganese, and aluminum

Global Opportunity

- Bloomberg New Energy Finance projects that electric vehicles will surpass internal combustion engine vehicle sales before 2040
- Benchmark Minerals Intelligence is tracking 181 Battery Manufacturing Megafactories with over 3,000 GWh of capacity expected in the coming decade
- Proposed phase out of internal combustion vehicles in multiple countries and cities
- New USMCA trade agreement are creating a requirement for advanced batteries to originate from North American for use in future U.S. electric vehicles

Battery Minerals are Critical Minerals

- U.S. Government published a Critical Minerals List, with 35 minerals and metals considered critical to the "national economy and national security" and cobalt, lithium, and manganese are included in the list
- Executive Order signed by the President of the United States, declaring a National Emergency to expand domestic mining industry for critical minerals

A Patented Process for Recycling Lithium-ion Batteries

HALLGARTEN & COMPANY Colonial Coal Intl: Sharks Begin to Circle

Colonial Coal Presentation

Epstein Research Report

Greening steel - 30yr challenge

Coking Gold - Doomberg

When will steel go green?

Canaccord 11/16/2021

John Kaiser - 9/9/20211

C olonial Coal (CAD TSX-V) closed at \$2.72 yesterday on light volume. On January 4th it hit a low of \$2.41 on the venture exchange and two days later hit a high of \$3.08. The stock moves quickly because the market depth is relatively thin and so far all those who bought dips have been rewarded. The chart shows a tightening triangle and time will tell whether we are going back towards support at \$2.11 or breaking towards \$3.40 again.

othing has changed. The metallurgical coal is still there, it is at a ridiculously cheap valuation, and management is working on selling the company. Met coal prices are still high and the need for met coal to make steel is not declining. This is the perfect storm for assets like Colonial's to be bought. As of Dec 30th there were 242,455 shares short.

arren Irwin's January 6th Colonial Coal comment posted on ceo.ca/cad: "[@BDMinefinder] Met Coal moves 17 bucks in a day and people here are debating whether Colonial should be trading at 50 cents or 60 cents per tonne while we wait to be sold. Think about it, the rule of thumb I used to use with base metal properties is 3 percent of spot for an in situ resource. That would be 12 bucks per tonne or roughly 60 bucks per share for Colonial There is a lot of room here and as we know even a lousy 3 bucks per tonne is 15 bucks per share. Could The Chinese, Indians, Australians, or others make money buying coal for 3 bucks in situ, mining it, washing it and getting it to port and then selling it for 400 bucks? I think so. Look at these economics versus what Kinross paid for Great Bear. Kinross will have to work way harder there to make dough from the metrics they paid."

eaborne coking coal fob price up on tight supply, supporting cfr China market

Seaborne coking coal fob prices jumped on **Monday January 10** on sustained tight supply in the seaborne spot market, while higher prices in the fob Australia market supported seaborne coking coal cfr prices.

Fastmarkets indices

Premium hard coking coal, cfr Jingtang: \$370.04 per tonne, up \$10.07 per tonne Hard coking coal, cfr Jingtang: \$337.44 per tonne, up \$9.09 per tonne Premium hard coking coal, fob DBCT: \$378.62 per tonne, up \$6.91 per tonne Hard coking coal, fob DBCT: \$330.15 per tonne, up \$7.50 per tonne

Market Trend News has been featuring small cap companies for 28 years. The newsletter started out as a print publication and is now distributed over the web.

We feature micro cap and small cap companies that want to spread the word about their company and potential.

Our featured companies come from a wide variety of sectors such as mining, oil and gas, technology, biotech and cannabis.

The Corporate Sponsors pages (featured companies) are companies who have paid for a social media advertising package with Market Trend News Inc. Market Trend News Inc may have a stock position in the company being featured.

The Editor's Watchlist section contains featured companies that the Editor has positions in or is thinking of buying positions in. Consider it a swing trader's blog and in no way a recommendation to buy or sell securities. He is not an advisor. Please do your own research and consult a licensed advisor before taking action.

You are responsible for your trades.

inks

Tradingview

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

Diamond Hands

Slang term for an investor who is ready to hold a position for the end goal, despite the potential risk, headwinds and losses.

Doii Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

Fibonacci Retracement (Fib)

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

FLEM & DHEM

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policymaking body. It is responsible for formulation of a policy designed to promote stable prices and economic growth.

FOMO

Fear Of Missing Out

Naked Shorting

It is the illegal practice of shorting stock that is not borrowed.

Nonfarm Payrolls

Is an official statistic released by the U.S. department of labor, usually on the first Friday of the month. It is a measure of the number of workers in the U.S. excluding farm workers and those employed in private households or non-profit organisations.

Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

Short Squeeze

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.
