### **Gold Rising Again!**

Gold has gone up \$150US/oz, from its low, in the last six weeks. Last week it broke through the significant resistance level of \$1832US/oz and now sits at \$1862US/oz.

We are approaching the 50% fib retracement line at \$1877US/oz and my FX trading platform printed a 4Hr divergence engulf sell signal. The Fib was pulled from the all time high to the \$1678US/oz recent low.

There are 6 more weeks left in 2021 and I think we have a shot at hitting the \$1915US/oz level and maybe if we are lucky the \$1959 US/oz resistance level.

Many junior gold explorers are trading much lower than they should be due to slow lab reporting and gold bouncing around. If you do the research and patiently accumulate (during tax loss selling season) companies with solid projects, a backlog of core at the lab, and maybe even some with proven gold resources, you may be handsomely rewarded in 2022.

Have a great rest of the week!

# Inflection Resources

Our featured company is a is a technically driven copper-gold and gold focused mineral exploration company with projects in Australia. Inflection Resources is systematically drill testing a large portfolio of projects in New South Wales and in Queensland. Inflection is exploring for large copper-gold and gold deposits in the northern interpreted extension of the Macquarie Arc, part of the Lachlan Fold Belt in New South Wales. The Macquarie Arc is Australia's premier porphyry gold-copper province being host to Newcrest Mining's Cadia deposits, the CMOC Northparkes deposits and Evolution Mining's Cowal deposits plus numerous exploration prospects including Boda, the recent discovery made by Alkane Resources.

#### **The Northern NSW Projects**

Targeting large, undercover Cu-Au & Au deposits in the northern extension of the Macquarie Arc in NSW. Inflection is currently systematically drilling a large portfolio of targets, all 100% owned.

#### Why NSW & The Macquarie Arc?

- Australia's foremost Au & Au-Cu porphyry belt.
- Macquarie Arc in the Lachlan Fold Belt hosts several world-class mines.
- Northern extension of belt is covered by post-mineral sedimentary sequence.
- New South Wales has an exceptional mining culture.
- Massive quantity of quality pre-competitive geological data compiled by government of NSW and Geoscience Australia.

#### **Dominant District-Scale Land Position**

- Biggest owner of exploration tenements and applications in the Macquarie Arc.
- Over 8,000 km<sup>2</sup> of exploration licenses and applications. Licenses 100% owned.
- Highly-strategic, district-scale land
   nosition
- Many major mining companies actively exploring for Cu-Au in the belt.

#### The Carron Gold Project Targeting high-grade orogenic lode

gold veins along strike from the historic Croydon Goldfields in Queensland. The Company controls over 30 km of untested NW trending structures.

Croydon is one of Queensland's significant historic gold camps with >1Moz Au production with average grades of 35 g/t Au\* widely reported.

#### Inflection has completed the following:

- 3,855-line km of 50 meter spaced airborne magnetics.
- 3D Magnetic Vector Inversion
   modelling.
- Constructed 3D geological model.
- Defined 25 initial drill targets.
- Completed 2 scout drill-holes

#### Work program:

First-pass drilling on highest priority targets.

#### **Ownership**:

- Current 50% ownership.
   (JV with Oakland Gold Pty Ltd.)
- Option to earn up to 70% interest
- by investing AUD\$0.5M.
- Pathway to earn a 100% interest.

ur featured company Rover Metals is a natural resource exploration company specialized in North American precious metal resources. Rover is currently advancing the gold potential of its projects located in the Northwest Territories of Canada at the 60th parallel. Rover has 100% ownership of its core gold assets.

14 million ounces of gold has been historically mined in the region.

#### The Cabin Gold Project

- 145km Road to city (Yellowknife, NT)
- Hydro (Strutt Lake Hydro, NT Power Corp)
- Four junior gold miners 5-10 years ahead of Rover in the mine building cycle.
- Readily available skilled mining labor in surrounding towns and city.

#### **Iron Formation Hosted Gold**

- Three land parcels of gold claims:
  - 1. Cabin Gold (2021 NEW drilling)
  - 2. Slemon Gold
  - 3. Camp Gold
- CAD\$10MM invested into exploration

#### **Comparable Historic Gold Mines**

- Lupin Gold Mine, NT, Canada
- Homestake Gold Mine, S. Dakota, USA

#### Q3-2021 Drilling Underway

#### Highly Sulfidized (>30% pyrite) Drill Targets

•~3,000 meter drill program underway

• High-grade gold at the Arrow Zone is associated with >30% sulfidization (pyrite)

- NEW Drill Targets were selected based on pyrite content:
  - o The Beaver Zone historic drilling reported >30% pyrite
    - -400 meter step-out target from Arrow Zone
    - -preliminary results showing 90% increase to reported historic grade
  - o The Andrew South Zone historic drilling reported >30% pyrite. Target is a folding hinge in the iron formation.

HALLGARTEN & COMPANY Colonial Coal Intl: Sharks Begin to Circle

#### Colonial Coal Presentation

Epstein Research Report

C olonial Coal \$CAD #TSXV closed at \$2.54 yesterday. The stock had a good push to \$2.79 first thing in the morning and then backed off the rest of the day. So far it has respected the lower trend line and bounced off the 50% fib retracement at \$2.11ish (red circle on the chart).

Recent Articles:Coking Gold - DoombergWhen will steel go green?Greening steel looms as a 30 year challenge

C olonial Coal is sitting on 695Mt of met coal for steel making. The company is for sale and the world's demand for steel is only going to increase. The stock can go up, down, sideways and it is still nowhere near where a takeout would happen. I will sit on my position and wait for something to happen. Pure joy will be getting up one morning with the stock halted.

B enz Mining \$BZ #TSXV is sitting near 52 week lows. It closed yesterday at .63. The company has had steady support at the .60 level. Benz has three drill rigs going and should complete their promised 50,000m of drilling by the end of 2021. Benz released news on [November 3rd] about their PhotonAssay samples but the majority of the drill core from this year has still not been reported. I'm looking forward to thousands of metres of results and have no problem waiting into next year. Hopefully the labs will catch up.

**G** atling Exploration \$GTR #TSXV is also sitting near 52 week lows. It closed yesterday at .265 and continues to trend lower. I'm hoping .25 will be the low and we can start climbing in the right direction. The company is raising another \$2.5 Million at .32/.34 per share, and also has more drill core assays to announce. The company announced a resource of 1.3 million oz on [September 23rd] and the market cap is \$12 Million ????

D urango Resources \$DGO #TSXV is setting 52 week lows. It closed yesterday at .045. Hindsight is 50:50 and you can't go back in time. Looking back on this purchase I see the clues I should have picked up on and acted upon. The company announced a few selected grab samples and sent a crew to their Discovery poperty. The stock is trading some volume as people are dumping. Good thing is someone is also buying. If I were management I would be worried about who is accumulating all the stock down here. Someone at Scotia dumped 600,000 yesterday and Anonymous bought 600,000 yesterday.

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

# Glossary

#### **Diamond Hands**

Slang term for an investor who is ready to hold a position for the end goal, despite the potential risk, headwinds and losses.

#### Doji Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

#### Fibonacci Retracement (Fib)

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

#### **FLEM & DHEM**

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

#### FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policymaking body. It is responsible for formulation of a policy designed to promote stable prices and economic growth.

#### FOMO

Fear Of Missing Out

#### **Naked Shorting**

It is the illegal practice of shorting stock that is not borrowed.

#### **Nonfarm Payrolls**

Is an official statistic released by the U.S. department of labor, usually on the first Friday of the month. It is a measure of the number of workers in the U.S. excluding farm workers and those employed in private households or non-profit organisations.

#### Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

#### **Short Squeeze**

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.
