### **Covid 19 Omicron!**

On Black Friday the World Health Organization decided to go with the transformer like name of Omicron for the new Covid-19 variant of concern, skipping the nu and xi Greek alphabet names. The W.H.O. news:

This B.1.1.529 (Omicron) variant was first reported to W.H.O. by South Africa and flagged due to its large number of mutations which may lead to increased reinfection.

The news seemed to spook markets with the Dow Jones Industrial Average dropping 905 points on Friday. Oil also dropped \$10 a barrel which is the largest one day drop in over a year.

I don't see the volatility going away anytime soon. Gold hit \$1875US/oz on November 16th and has since backed off again, currently trading at \$1780. Skilful traders could be trading gold for \$100US/oz per swing. I thought \$1915 was in the cards on the last rise but it got stopped half way. Hopefully the \$1780 low last week will be a new higher low.

Have a great rest of the week!

#### RARE EARTH ELEMENTS: WHERE IN THE WORLD ARE THEY?

Rare earth elements (REEs) are a group of 17 elements whose importance is critical in high technology. Their use has exploded as electronics and renewable technologies increasingly have become part of everyone's daily lives. Rare earths are abundant in the Earth's crust but mineable concentrations are less common, making reserves potential very valuable and strategic. \*The USGS tracked the world's reserves in tons (imperial).

#### **Investment Highlights**

Expansion resource drilling underway to convert and increase historical resource to NI 43-101 compliant.

C\$2,400,000 raised for drilling in Q2-2021.

Testing untested iron formation nose hinges which could host significantly higher-grade gold intercepts.

Four historic, at surface, proven brownfields gold zone targets remain untested by Rover.

Gold at Cabin is hosted in steeply-dipping folded iron formation. Only the top 100m of the iron formation has been drilled. The iron formation extends for at least 15km in length at surface (greater length if folding taken into consideration).

12 additional greenfields drill targets at the Cabin Gold Project.

2 additional nearby projects with similar geology (Slemon Gold & Camp Gold claims).

O ur featured company Rover Metals is a natural resource exploration company specialized in North American precious metal resources. Rover is currently advancing the gold potential of its projects located in the Northwest Territories of Canada at the 60th parallel. Rover has 100% ownership of its core gold assets.

14 million ounces of gold has been historically mined in the region.

#### **The Cabin Gold Project**

- 145km Road to city (Yellowknife, NT)
- Hydro (Strutt Lake Hydro, NT Power Corp)
- Four junior gold miners 5-10 years ahead of Rover in the mine building cycle.
- Readily available skilled mining labor in surrounding towns and city.

#### **Iron Formation Hosted Gold**

- Three land parcels of gold claims:
  - 1. Cabin Gold (2021 NEW drilling)
  - 2. Slemon Gold
  - 3. Camp Gold
- CAD\$10MM invested into exploration

#### **Comparable Historic Gold Mines**

- Lupin Gold Mine, NT, Canada
- Homestake Gold Mine, S. Dakota, USA

#### Q3-2021 Drilling Underway

#### Highly Sulfidized (>30% pyrite) Drill Targets

•~3,000 meter drill program underway

• High-grade gold at the Arrow Zone is associated with >30% sulfidization (pyrite)

- NEW Drill Targets were selected based on pyrite content:
  - o The Beaver Zone historic drilling reported >30% pyrite
    - -400 meter step-out target from Arrow Zone
    - -preliminary results showing 90% increase to reported historic grade
  - o The Andrew South Zone historic drilling reported >30% pyrite. Target is a folding hinge in the iron formation.

#### **Investment Highlights**

#### PREMIER MINING JURISDICTION

Exploring mining-friendly New South Wales & Queensland, Australia

#### **EXPLORING FOR COPPER & GOLD**

Targeting Tier-1 Cu-Au porphyry deposits in NSW & high-grade orogenic lode gold deposits in Queensland

#### **INNOVATIVE EXPLORATION** STRATEGY

Aggressively drill testing previously un-drilled targets undercover

#### **HIGHLY EXPERIENCED TEAM**

Technically driven team of minefinders with capital market expertise

#### **100% PROJECT OWNERSHIP**

District scale land positions – over 8,000 Km<sup>2</sup> of licenses in NSW

#### **STRONG SHAREHOLDER BASE**

Substantial ownership by management with strong institutional support

Large management and insider ownership – 31% Strong institutional support – 25%

## Inflection Resources

ur featured company is a is a technically driven copper-gold and gold focused mineral exploration company with projects in Australia. Inflection Resources is systematically drill testing a large portfolio of projects in New South Wales and in Queensland. Inflection is exploring for large copper-gold and gold deposits in the northern interpreted extension of the Macquarie Arc, part of the Lachlan Fold Belt in New South Wales. The Macquarie Arc is Australia's premier porphyry gold-copper province being host to Newcrest Mining's Cadia deposits, the CMOC Northparkes deposits and Evolution Mining's Cowal deposits plus numerous exploration prospects including Boda, the recent discovery made by Alkane Resources.

#### The Northern NSW Projects

Targeting large, undercover Cu-Au & Au deposits in the northern extension of the Macquarie Arc in NSW. Inflection is currently systematically drilling a large portfolio of targets, all 100% owned.

#### Why NSW & The Macquarie Arc?

- Australia's foremost Au & Au-Cu porphyry belt.
- Macquarie Arc in the Lachlan Fold Belt hosts several world-class mines.
- Northern extension of belt is covered by post-mineral sedimentary sequence.
- New South Wales has an exceptional mining culture.
- Massive quantity of quality pre-competitive geological data compiled by government of NSW and Geoscience Australia.

#### Dominant District-Scale Land Position

- **Biggest owner of exploration tenements** and applications in the Macquarie Arc.
- Over 8,000 km<sup>2</sup> of exploration licenses and applications. Licenses 100% owned.
- Highly-strategic, district-scale land position
- Many major mining companies actively exploring for Cu-Au in the belt.

#### The Carron Gold Project Targeting high-grade orogenic lode

gold veins along strike from the historic Croydon Goldfields in Queensland. The Company controls over 30 km of untested NW trending structures.

Croydon is one of Queensland's significant historic gold camps with >1Moz Au production with average grades of 35 g/t Au\* widely reported.

#### Inflection has completed the following:

- 3,855-line km of 50 meter spaced airborne magnetics.
- **3D Magnetic Vector Inversion** modelling.
- Constructed 3D geological model.
- Defined 25 initial drill targets.
- Completed 2 scout drill-holes

#### Work program:

First-pass drilling on highest priority targets.

#### **Ownership**:

- Current 50% ownership. (JV with Oakland Gold Pty Ltd.)
- Option to earn up to 70% interest
- by investing AUD\$0.5M.
- Pathway to earn a 100% interest.

July 5th, 2021 Report

HALLGARTEN & COMPANY Colonial Coal Intl: Sharks Begin to Circle

Colonial Coal Presentation

Epstein Research Report

Greening steel - 30yr challenge

Coking Gold - Doomberg

When will steel go green?

C olonial Coal \$CAD #TSXV closed at \$2.68 yesterday. The stock had a good push to a lower high of \$3.57 on November 22nd. Since then Colonial has moved below the \$3 mark and also broke below the lower trend line. The stock trades very thin, lots of space between levels of bids and offers. Yesterday Anonymous (people wanting to remain anonymous, usually full brokerage institutions) was the main buyer and CIBC was the main seller. There is positioning going on and I would imagine the stock will continue to bounce around by .15-.45 per day. Will a deal get done? When? At what price per tonne?

A new 26 page research report was released by Canaccord which could have contributed to the recent rise back to \$3.57. Just remember they didn't put a target on the stock probably because they are doing investment banking work for Colonial Coal.

Canaccord Research - November 16th John Kaiser's thoughts - Sept. 9th

G atling Exploration \$GTR #TSXV is setting new 52 week lows. It closed yesterday at .245 and continues to trend lower. The company released drill results on November 11th which included 9.4g/t over 4.0m. The news also stated that Gatling has cancelled its previously announced private placement that was announced on October 18th. Tax loss selling vs value in the ground could be very interesting here. What will December bring?

Nov. 24th News: Gatling Extends Multiple Zones..... Including 9.4g/t Au over 4.0m

**F** ury Gold Mines \$FURY #TSX has been bouncing between .79 and .94 since I introduced the stock in our August 23rd newsletter. The company has been hit with slow lab turn around like many other juniors during this pandemic. Fury finally put out some results yesterday which included 9.36g/t over 3 metres at their hinge target at the Eau Claire project in Quebec.

On October 13th Fury announced that they closed a private placement for \$5.59 Million priced at .75 with a warrant at \$1.20. If the company trades at or above \$1.50 for 20 days the company can accelerate the exercising of the warrants. Lots of drilling to come over the next year.

On October 22nd Benz Mining made their \$260,000 Eastmain option payment to Fury.

Nov. 29th News: Fury Drills 9.36g/t Gold over 3 Metres at the Hinge Target at Eau Claire

#### Tradingview

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

### Glossary

#### **Diamond Hands**

Slang term for an investor who is ready to hold a position for the end goal, despite the potential risk, headwinds and losses.

#### Doji Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

#### Fibonacci Retracement (Fib)

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

#### **FLEM & DHEM**

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

#### FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policymaking body. It is responsible for formulation of a policy designed to promote stable prices and economic growth.

#### FOMO

Fear Of Missing Out

#### **Naked Shorting**

It is the illegal practice of shorting stock that is not borrowed.

#### **Nonfarm Payrolls**

Is an official statistic released by the U.S. department of labor, usually on the first Friday of the month. It is a measure of the number of workers in the U.S. excluding farm workers and those employed in private households or non-profit organisations.

#### Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

#### **Short Squeeze**

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.
