GOLD

The Market

Gold may have put in a bottom at \$1676.80 on March 8th. It hit my target zone, traded there for a few days, and is now heading higher.

Gold's move last year, started on March 16th with a low of \$1451.23 and the run ended on August 7th with an all time high of \$2075.22 US/oz.

Last year's move was over \$600US per oz in about 6 months. If we see similar moves this year, gold will see new all time highs. Time will tell but I am glad I'm positioned in a few good gold junior explorers.

Other commodities to keep an eye on are silver, copper, uranium, and rare earth metals.

GME

MARKET UPDATE

Gamestop GME

GameStop \$GME is set to report earnings on Tuesday, March 23rd after the market closes.

Will it matter?

Just when I think \$GME is over, boom, there it goes again. Gamestop \$GME was at \$137 last newsletter and it has since soared to \$348.50 again! WallStreetBets still at it?

AMC \$AMC is another WallStreetBets play that has a similar looking chart but lower priced. It closed \$13.93 on Friday. In 2021 it has gone from \$1.91 to \$20.36!

Drilling Map

Our featured company is focused on the exploration and development of flake graphite in Quebec for the new green economy.

Lomiko is a Canadian-listed junior graphite exploration and development company. It's flagship asset is the La Loutre graphite deposit, located in Quebec, Canada about 120 km north-west of Montreal and 53 km southeast of the currently operating Imerys Graphite and Carbon Timcal Lac des Iles graphite mine.

The La Loutre deposit currently has an NI 43-101 compliant resource estimate completed in 2016, with 4.1 M tonnes of 6.5% flake graphite in the indicated category and 6.2 M tonnes of 6.1% flake graphite in the inferred category based on a cut-off grade of 3% in an open pit.

Lomiko plans on updating their resource estimate soon, integrating drilling data from 2019 in the property's Refractory Zone which features some notable, relatively long and high grade intercepts that would be expected to add tonnes and potentially improve the grade of the overall deposit.

Lomiko just completed the remainder of purchase and now owns 100% of the property. The resource estimate update is currently expected in Q1 of 2021.

EDITOR'S WATCHLIST

Colonial Coal CAD - TSX Venture

Colonial Coal [CAD - TSX-V] is still churning in the .65-.69 area. It seems to be capped here because of a couple large offers (380,000 shares offered at .69/.70). Hopefully they will be bought soon and the stock can trade normally.

Insider Buying = Bullish!

David Emri continues to buy in the market and has control over a large position.

Direct Ownership: 10,475,000 shares
Indirect Ownership: 428,200 shares
Control or Direction: 7,785,000 shares

Since February 26th he has bought 439,000 shares between .65 and .71.

It is a waiting game and it is hard to be patient but the company is for sale.

Drilling EM conductors at NW Zone returns visible gold

Benz Mining Presentation

Benz Mining [BZ - TSX-V] seems to have bottomed out at .72. It looks like it is finding support in the .75 to .77 range. The chart shows more major support at .65 and a bit of resistance at the .92 level. All shareholders are eagerly waiting more drill results.

The exciting thing about Benz is that they will be drilling all year, 50,000+ meters. They are also re-assaying some of the wildcat results using the Photon Assay

method. This is done in Australia and thousands of samples are being shipped. I would imagine there should be news coming fairly soon.
