3-31-22 INVESTMENT PITCH VIDEO

U.S. dollar reversal?

I would like to welcome Pampa Metals (PM CSE) to our newsletter! Pampa will be exploring for copper and gold within its portfolio of eight projects in Chile.

The EUR/USD chart shows the strength the U.S. dollar has had since the beginning of 2021. We now have a lower trend line being hit in the 1.08 area. Will this be the low this year or will it break and challenge the 2020 high of 1.07 or maybe even the 2017 high of 1.03?

With the U.S. dollar strength, gold has held up quite well. The Russian invasion of Ukraine pushed it to \$2070 US/oz, which was almost a new all time high. It is currently trading in a range from \$1900 to \$1950. Not bad considering the low in 2021 was \$1678US/oz. Any weakness in the U.S. dollar will certainly help gold.

Have a great week!

HOW THE EXPANSION OF MEGACITIES WILL BOOST METAL MARKETS

HOW THE EXPANSION OF
MEGACITIES
WILL BOOST METAL MARKETS

By 2035, Asian cities as a group will be richer than European and North American cities combined.

As countries expand and people get richer, cars get more numerous, electricity and public transport networks expand. All this means more steel, more copper, more aluminum.

Aluminum

Demand (tonnes)

This infographic takes a look at what metal demand will be if urbanization and rising incomes continue to 2035, according to the Global Infrastructure Anti-Corruption Centre.

Snapshot

Copper: One of the greatest growth profiles and demand / supply metrics

Gold: One of most attractive high-value metals

Chile: Elephant country for major economic copper deposits

People: Highly experienced with execution ability & track record

Projects: Portfolio breadth & depth – along proven mineral belts of Chile

Current focus: 4 projects – with 2 additional projects subject to 3rd-party expenditure via JV

Progress: Rapid progress including 2 drilled projects – further drilling planned for 2022

JV Funding: 2 projects subject to 3rd party expenditures – drilling started in January 2022

INVESTOR SUMMARY

FACT SHEET

NEWS RELEASES

Our featured company owns a highly prospective 62,000-hectare portfolio of eight projects for copper and gold located along proven mineral belts in Chile, one of the world's top mining jurisdictions. The Company has a vision to create value for shareholders and all other stakeholders by making a major copper discovery along the prime mineral belts of Chile, using the best geological and technological methods.

The Projects - Current Priorities

Cerro Buenos Aires (7,600 Ha):

- Located south of Spence / Sierra Gorda district
- Recent drilling through post-mineral cover has vectored towards porphyry target

Redondo-Veronica (6,600 Ha):

- Located north of giant La Escondida district
- Recent drilling gives line of sight to 2 deep porphyry targets

Block 4 (6,800 Ha):

- Located south of giant La Escondida district
- Quartz-vein stockwork – coincident with magnetic high – partial post-mineral cover

Block 3 (10,100 Ha):

- Located south of giant La Escondida district
- Post-mineral cover - adjacent to 2 historically drilled porphyry targets – magnetic anomalies

Arrieros (13,700 Ha):

- Large, post-mineral covered property situated between Chuquicamata and Centinela districts
- Magnetic and IP anomalies

Block 2 (3,300 Ha):

- Structural target – pending exploration advances

Projects subject to 3rd Party Expenditures (Austral Gold Ltd)

Morros Blancos (7,300 Ha):

- HS systems – maar-diatremes – vuggy silica
- Drilling started (January 2022)

Cerro Blanco (6,500 Ha):

- Small lithocap outcrop coincident with magnetic high. Extensive post-mineral cover

AMERICAN MANGANESE INC.

A Critical Metal Company Focusing on Recycling Lithium Ion Electric Vehicle Batteries

With planned operation start-up in February 2022, American Manganese's 500 kg/day cathode waste RecycLiCo™ plant is poised to become the first hydrometallurgical demonstration facility in North America for lithium-ion battery recycling and upcycling.

Our featured company is a critical metal company focused on the recycling of lithium-ion batteries using their RecycLiCo™ Patented Process. The process offers a closed-loop and environmentally friendly hydrometallurgical solution for the recycling of cathode materials from spent lithium-ion batteries and battery manufacturing scrap. The Company achieves high recovery and purity of materials such as lithium, cobalt, nickel, manganese, and aluminum from cathode chemistries such as NCA (lithium nickel cobalt aluminum oxide), NMC (lithium nickel manganese cobalt oxide), LCO (lithium cobalt oxide), and LMO (lithium manganese oxide). The RecycLiCo™ patented process aims to produce materials as high-quality cathode precursor, that could be directly integrated into the re-manufacturing of battery cathodes using minimal processing steps.

Patented Technology & Publications

- The Company holds patents in Canada, US, China and South Africa for production of electrolytic manganese metals from low-grade manganese deposits
- Publication in the peer-reviewed Journal of the Electrochemical Society – Experimental Study on Recycling of Spent Lithium-Ion Battery Cathode Materials

Global Opportunity

- Bloomberg New Energy Finance projects that electric vehicles will surpass internal combustion engine vehicle sales before 2040
- Benchmark Minerals Intelligence is tracking 181 Battery Manufacturing Megafactories with over 3,000 GWh of capacity expected in the coming decade
- Proposed phase out of internal combustion vehicles in multiple countries and cities
- New USMCA trade agreement are creating a requirement for advanced batteries to originate from North American for use in future U.S. electric vehicles

Strong Market Fundamentals

- Closed-loop and sustainable lithium-ion battery recycling process
- Low operating cost (estimated reagent consumption cost of \$1/kg of cathode material processed)
- Low energy consumption & no high heat
- No landfill waste or toxic fumes
- High extraction and purity potential of lithium, nickel, cobalt, manganese, and aluminum

Battery Minerals are Critical Minerals

- U.S. Government published a Critical Minerals List, with 35 minerals and metals considered critical to the “national economy and national security” and cobalt, lithium, and manganese are included in the list
- Executive Order signed by the President of the United States, declaring a National Emergency to expand domestic mining industry for critical minerals

DNG**CORPORATE SPONSOR**

dynacor

Our featured company is a very profitable TSX listed company focused on gold ore processing in Peru. They have been pouring gold in Peru since 1998.

About Dynacor

- An environmentally and socially responsible industrial gold ore processor
- Committed to shareholder returns through monthly dividend stream and stock buyback program
- An alternative gold company investment with a proven and profitable business model
- Engaged in precious metal sales through the processing of ore purchased from the ASM (artisanal small-scale mining) industry
- Environmentally and socially responsible gold sales through PX IMPACT® gold program
- Fine luxury watchmakers pay premiums for certified clean PX IMPACT® gold
- Decades of experience servicing the ASM industry

**NEW FEBRUARY 2022
12 PAGE PRESENTATION**

3 YEAR PERFORMANCE REVIEW

DNG NEWS RELEASES

10 Consecutive Years of Profit

- Peru's largest ASM (artisanal small-scale mining) ore purchaser and processor
- Dynacor aims to become the world's leading processor of artisanal, environmentally and socially responsible gold ore
 - Plans to leverage 22 plus years of expertise and expand business model globally
 - Strategic partnership with Swiss based refiner, PX Precinox | PX GROUP
 - *Strong balance sheet with no debt and US\$13.4 million in cash reserves (as of Q2-2021 report)
 - Non-dilutive business model with only 39 million shares outstanding (last equity financing in 2010)

Financially Solid & Committed to Shareholder Returns

In May 2021, Dynacor declared its 2nd dividend increase by 33% The dividend policy is a key component to Dynacor's strategy to return cash to shareholders.

Starting in January 2022 the company will be increasing its dividend 25% more to C\$0.10/yr.

NEWS ALERT

ANNUAL GOLD PRODUCTION EXCEEDING 100,000 OUNCES

Dynacor completed 2021 with both production and financial historical high performances on its way to its eleventh (11th) consecutive year of profit. The Corporation achieved production record of 106,862 AuEq ounces powering total sales to \$196 million a significant 93% increase compared to 2020, and a net income of \$11.8 million.

The war in Ukraine continues. Many countries continue to place sanctions on Russia and Europe scrambles to find a way to not buy Russian energy. Commodity prices continue to rise and there is much uncertainty on how long this situation will last.

What are Putin's plans? What happens if he escalates things further? Should speculative investors even be putting new money into the markets? What is your risk tolerance?

I found Warren Irwin's interview very interesting, I suggest you have a listen. How worried are you about a nuclear weapon being used?

Commodity Investing During Uncertain Times with Resource Fund Manager Warren Irwin

Gatling Exploration (GTR TSX-V) closed Friday at .35 a share. The valuation put on Gatling with this take out bid from MAG Silver is ridiculously low in my opinion. Gatling's market cap is approximately \$15.8M with 1.3M oz in their 43-101 report. With gold trading at \$1950+ US/oz, and the project located in Ontario Canada, MAG Silver is getting an amazing deal. Too amazing for Gatling shareholders to like the transaction.

Gatling shareholders are waiting for their paperwork so they can vote on the transaction. I'm also thinking the majority of shareholders are also crossing their fingers that another bid comes in. Go have a look at the maps, Agnico Eagle (AEM-TSX) would be an obvious candidate to want the properties, they border Agnico's lands.

March 11th 2022: MAG Silver to Acquire Gatling Exploration in All-Share Acquisition

Durango Resources (DGO TSX-V) closed Friday at .085 per share. Over the last 3 weeks or so the company's stock keeps closing at .085 with the odd touch of overhead resistance which is at .09. Chart shows next resistance is .12 and then .15. The stock traded between .12 and .15 for 3 months in 2020. Volume continues to be abnormally high for a junior that is not drilling and basically has run out of money. I would guess a group has been hired to manage the market.

Durango's last news release was about going to do some surface sampling at their NMX East Lithium property in Quebec. The key word is "Lithium" which is a very hot commodity right now.

Their \$2.8M financing in August of 2020 gave the purchasers a warrant for three years at 15 cents a share. The stock would have to double from this point for these to be exercised. It will be interesting to see what happens over the next month.

Benz Mining (BZ TSXV-V) closed at .68 on Friday. The company's shares hit a 6 month high of .75 on March 31st. In the last month, 1.9 Million shares have traded with brokerage RBC accumulating over 1/2 million shares.

Benz has 60+ holes to report from their 2021 drilling and they are continuing to drill. Also there is the Lithium outcrop they found at Ruby Hill West. I would imagine this will be drilled in short order. Lots of potential here.

Fury Gold Mines (FURY TSX) closed at .80 on Friday. A month ago the company's shares spiked to \$1.08 on some volume. After breaking the \$1 mark it promptly came back down and set its yearly low of .74.

Last Thursday Fury announced a 15,000 metre drill program at its Eau Claire deposit.

"We are excited to resume drilling in Quebec where we see considerable opportunity to expand our Eau Claire Deposit and the highly prospective Percival target," said Tim Clark, CEO of Fury. "Our confidence in our targets is much higher this year due to the impressive amount of technical work and results we were able to obtain in the past 18 months."

Lots of drilling = lots of news.

April 7th 2022: Fury Commences Drilling at The Eau Claire Deposit

Tradingview

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

Glossary

Diamond Hands

Slang term for an investor who is ready to hold a position for the end goal, despite the potential risk, headwinds and losses.

Doji Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

Fibonacci Retracement (Fib)

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

FLEM & DHEM

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policymaking body. It is responsible for formulation of a policy designed to promote stable prices and economic growth.

FOMO

Fear Of Missing Out

Naked Shorting

It is the illegal practice of shorting stock that is not borrowed.

Nonfarm Payrolls

Is an official statistic released by the U.S. department of labor, usually on the first Friday of the month. It is a measure of the number of workers in the U.S. excluding farm workers and those employed in private households or non-profit organisations.

Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

Short Squeeze

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.

YOLO

You Only Live Once
