GOLD ORE PROCESSOR: DYNACOR GOLD MINES

AZS

Arizona Silver

Arizona Silver is exposed to both silver and gold with their 3 projects in Arizona and one in Nevada. More fully funded drilling is planned to begin soon.

LMR

Lomiko Metals

Lomiko Metals recently announced a locked cycle test that generated a combined concentrate grading 97.8% total carbon at 93.5% graphite recovery. "These very encouraging results of initial testing suggest that La Loutre graphite may be suitable for high-end industrial use," stated A. Paul Gill, CEO.

Gatling Exploration

A new company joins the Editor's Newsletter Watchlist! Gatling Exploration is busy drilling 3 connected high-grade gold deposits over 4.5 km strike length and 1 km at depth.

DNG

Dynacor Gold Mines

I'd like to welcome our new sponsor, Dynacor Gold Mines, to our newsletter!

I have had Dynacor Gold Mines on my watchlist for over two years because of all the positives the company offers potential investors.

- **Share Structure:**
Dynacor only has 39M Shares Outstanding.
- **Production:**
The company recently announced their best 1st Quarter of sales ever, \$40.9 million U.S.
- **Dividend:**
The company has been paying out a dividend since October 2018. At \$2.50/share it works out to 2.4 percent.
- **Expansion:**
The company is currently increasing their Veta Dora ore processing plant capacity by 43% in Chala, Peru.

About Dynacor

- An industrial gold ore processor
- Committed to shareholder returns through monthly dividend stream and stock buyback program
- Engaged in metal sales through the processing of ore purchased from the ASM (artisanal small-scale mining) industry
- Environmentally and socially responsible gold sales through PX IMPACT® gold program
- Fine luxury watchmakers pay premiums for certified clean PX IMPACT® gold
- Decades of experience servicing the ASM industry
- Potential to create value through the drill bit at 100% owned Tumipampa gold project
- *US\$16.6 million (C\$22.1 million) in cash and debt-free

Our featured company is focused on gold ore processing in Peru. They have been pouring gold in Peru since 1998.

Dynacor's 300 tonnes per day plant opened in 2016. The plant was designed for up to 600 tonnes per day expansion. On March 24th, 2021 the company announced that they would spend \$1.8Million to upgrade its ore processing capacity to 430 tonnes per day, a 43% increase. The construction completion date is scheduled for June 2021. The processing plant is located 5km off the main Pan American Highway in the hub of ASM high-grade operations (South Peru).

Dynacor's PX IMPACT® Clean Gold Program

- Environmental, social and ethical practices that respect human rights are an integral part of the PX IMPACT® clean gold program
- An investment premium is paid by PX Precinox customers on the PX IMPACT® clean gold program
- A lasting & positive contribution to the economic, social and environmental development of our mining communities
- Guarantees complete traceability across the gold ore supply chain coming from government registered miners
- 100% of the premium paid is invested into the ASM mining communities

[View the Presentation](#)

[View the Fact Sheet](#)

Dynacor Business Cycle:

1. Purchase high-grade ore at a discount to the spot price of gold from ASM client list consisting of over 500 mining groups
2. Weigh, assay & screen ore for gold content at our Veta Dorada plant
3. Ready for payment to ASMs within 72 hours from reception of ore
4. 5-8 days in processing the ASM ore to a gold dore bar level 99.5% pure
5. Receive payment at gold spot price from our strategic partner, PX Precinox in Switzerland

Dynacor's 2021 financial forecast has the company having total sales of \$150M U.S. with an Earnings per Share of US\$0.18 (.23CAD) based on an average gold price of \$1850US/oz. The price of gold directly influences Dynacor's bottom line.

Dynacor is also looking at expanding into processing gold ore in Senegal and they are planning to drill their Tumipampa property in South Central Peru.

Our featured company is engaged in junior mining exploration (gold and silver) in Nevada and Arizona. The company was founded in November 2016, has a tight share structure and insiders have been participate in every financing.

The Philadelphia Property Drill Program is Now Underway

Philadelphia Slide Show

- Drill holes also contain high levels of Beryllium
- Past production indicates gold grades ranged from 10 - 27g/t Gold
- Historic silver grades in production shaft average 420 g/t Silver
- Readily accessible - less than 100 metres from paved road access
- 1.5 km of strike untested to the north and approximately 2 km of strike untested to the south

[Presentation](#)[Fact Sheet](#)[GMN Report 3-31-2021](#)

Property Highlights:

The Philadelphia Property

- 100% owned - High-grade historic producer
- No NSR, Bought out lease agreement
- 5 km of strike untested to date
- 33.56 gpt Au & 54.7 gpt Ag over 2.35m
- 10.76 metres containing 9.26 gpt Au , 79.8 gpt Ag, & 344 gpt Be
- 41.6 gpt Au & 94.4 gpt Ag over 0.76 m.
- 23.47 gpt Au & 97.2 gpt Ag over 2.3 m.

Silverton Gold-Silver Project

- Carlin Type Deposit
- 100% owned - 1540 acres
- Past drill results contain 1 to 16 grams gold

The Ramsey Silver Project

- 100 % owned
- 18 for 18 on drill results on "Ramsey Mine target"
- High-grade historic silver producer
- Silver mineralization is open-pittable at depths intersected to date
- All holes have hit thick zone of "disseminated silver"

Sycamore Canyon Gold-Silver Project

- 100 % owned
- 31 gpt Gold & 553 gpt Silver at surface
- 800 Meters long & 110 meters wide to date
- Maiden drill program planning in process

Drilling Map

Our featured company is focused on the exploration and development of flake graphite in Quebec for the new green economy.

Lomiko is a Canadian-listed junior graphite exploration and development company. It's flagship asset is the La Loutre graphite deposit, located in Quebec, Canada about 120 km north-west of Montreal and 53 km southeast of the currently operating Imerys Graphite and Carbon Timcal Lac des Iles graphite mine.

The La Loutre deposit currently has an NI 43-101 compliant resource estimate completed in 2016, with 4.1 M tonnes of 6.5% flake graphite in the indicated category and 6.2 M tonnes of 6.1% flake graphite in the inferred category based on a cut-off grade of 3% in an open pit.

Lomiko plans on updating their resource estimate soon, integrating drilling data from 2019 in the property's Refractory Zone which features some notable, relatively long and high grade intercepts that would be expected to add tonnes and potentially improve the grade of the overall deposit.

Lomiko just completed the remainder of purchase and now owns 100% of the property. The resource estimate update is currently expected in Q1 of 2021.

In 2020, The Quebec Government released the Quebec Plan for Development of Critical and Strategic Minerals ("The Quebec Plan") which indicates graphite demand would likely increase 300-500% in the coming decades as more is used in the production of spherical graphite for anode portion of Electric Vehicle Lithium-ion batteries.

In 2021 the company's headlines have been:

1-7-2021: Gatling Targets Aggressive Zone Growth and Near Surface Mineralization at Larder Gold Project with **25,000 metre Drill Program**

1-26-2021: Gatling Drills **101.3 m of 1.1 g/t Au** of Widespread, Near Surface Gold Mineralization at Larder Gold Project

2-16-2021: Gatling Drills **170.0 m of 1.5 g/t Au** from Near Surface; Proves Growing Continuity and Strength of Mineralization at Larder Gold Project, Ontario

4-7-2021: Gatling drills **114.3 m of 0.8 g/t Au** at Larder

4-20-2021: Gatling Drills **200.7 m of 1.5 g/t Au including 23.7 m of 6.1 g/t Au** in Zone 2 at the Fernland Deposit; Further Outlining the Near Surface Potential Along Strike

Corporate Presentation

Technical Presentation

The Northern Miner Article

Gatling Exploration's (GTR TSX-Venture) chart has been getting more and more interesting and I thought it was time to add it to my newsletter watchlist section.

Gatling Exploration's stock has been trading sideways for the last several months and now it appears it is getting ready to break both the downward upper trend line and the .51 resistance level.

I purchased my initial position last summer and was surprised that the company decided to roll back a fairly tight structure last December. The company rolled the stock back 1 for 2 and raised \$4.6 Million for drilling.

I have since quadrupled my position and sit at about .52 for a cost base.

Their summary from their [website](#) sums it up very nicely:

"Gatling Exploration (TSX-V:GTR) owns the advanced, high-grade Larder gold project in Ontario, Canada. Larder sits on the Cadillac-Larder fault, in the heart of the Abitibi greenstone belt, just 35km east of Kirkland Lake. The project boasts a sizable historical resource of 43,800 indicated Au oz at 4.1 g/t and 917,000 inferred Au oz at 5.6 g/t. In the last twelve months, Gatling proved that all three deposits at Larder are part of a single mineralized system stretching for over 4.5km. The mineralized footprint has been expanded in every direction and the company is now sitting on 140km of successful drill results outside of the historical estimate. Gatling is now focused on near surface drill targets as well as potential at depth and is rolling out a 25km drill program during H1/21.

The company is well-financed to deliver on a catalyst rich 2021, including a resource update in the second half of the year."

Gatling Exp. and the project were spun out of Bonterra BTR TSX-Venture in 2018.

So we have a company with a market cap of \$20 Million, with \$4.5M in the bank, that has an existing historical resource of 960,000oz. So at a gold price of almost \$1800US/oz we are valuing the company's gold historical resource at about \$16US/oz? Ridiculously cheap. It should probably be more like \$30-\$40US/oz.

Now factor in:

- 140,000m of drilling that will go into the next resource estimate coming late 2021.
- The deposit is actually 3 connected deposits stretched over 4.5km.
- The deposit is shallow and located in Ontario, Canada.
- Drill intercepts that are over 100m long including the last hole of 200m!

Gatling's drill program will provide plenty of news and I think that this company deserves a higher valuation. I think the company's share price will respond to higher gold prices and get a boost when the new resource estimate is released.

*The historical estimate was in 2011 for a 43-101 done for Bear Lake Gold Ltd. Gatling is not treating the historical estimate as current mineral reserves. Not acknowledging a previous 43-101 ?

Larder Project
