Colonial Coal Durango Resources

Colonial Coal gets a boost in the market and Durango Resources teases us with a picture tweet showing visible gold in the core.

GOLD

The Market

I haven't moved my red reversal oval from my chart. Gold entered the target area and made a bottom on March 8th. It has now retested the March 8th bottom and formed a double bottom.

This week will probably tell the tale. The U.S.Dollar/Euro currency pair has hit the 38.2% fib retracement (pulled from the Euro's March 18th, 2020 low to the January 6th, 2021 high). It might be time for some US\$ weakness. FOMC minutes are released on Wednesday and Federal Reserve Chair Powell speaks on Thursday.

Breaking above the \$1760 resistance level would be a very good sign. Further weakness breaking the double bottom will likely result in a slide to the \$1610 or \$1555 US/oz area.

WHY GOLD MINING STOCKS OUTPERFORM GOLD IN BULL MARKETS

How Gold Stocks Excel in **Gold Bull Markets**

THE RETURNS OF GOLD MINING STOCKS VS. GOLD BULLION

Because of their operating leverage, gold mining stocks have the potential to outperform as gold prices rise. Higher gold prices often result in increased profit margins and free cash flow for gold miners, which can result in higher returns and dividends for shareholders.

RARE EARTH METALS PRODUCTION IS NO LONGER MONOPOLIZED BY CHINA

RARE EARTH METALS

PRODUCTION IS DIVERSIFYING AGAIN

China has been the world's primary source of rare earth elements since the late 1990s. However, other countries have recently ramped up their production in a bid to reduce reliance on China.

WHAT ARE RARE EARTH ELEMENTS?

A group of 17 minerals that power several modern technologies. In fact, it's likely the screen you're viewing this on contains a few of them.

AZSCORPORATE
SPONSOR

Our featured company is engaged in junior mining exploration (gold and silver) in Nevada and Arizona. The company was founded in November 2016, has a tight share structure and insiders have been participate in every financing.

The Philadelphia Property Drill Program is Now Underway

Philadelphia Slide Show

- Drill holes also contain high levels of Beryllium
- Past production indicates gold grades ranged from 10 - 27g/t Gold
- Historic silver grades in production shaft average 420 g/t Silver
- Readily accessible - less than 100 metres from paved road access
- 1.5 km of strike untested to the north and approximately 2 km of strike untested to the south

[Presentation](#)
[Fact Sheet](#)
[GMN Report 3-31-2021](#)

Property Highlights:

The Philadelphia Property

- 100% owned - High-grade historic producer
- No NSR, Bought out lease agreement
- 5 km of strike untested to date
- 33.56 gpt Au & 54.7 gpt Ag over 2.35m
- 10.76 metres containing 9.26 gpt Au , 79.8 gpt Ag, & 344 gpt Be
- 41.6 gpt Au & 94.4 gpt Ag over 0.76 m.
- 23.47 gpt Au & 97.2 gpt Ag over 2.3 m.

Silverton Gold-Silver Project

- Carlin Type Deposit
- 100% owned - 1540 acres
- Past drill results contain 1 to 16 grams gold

The Ramsey Silver Project

- 100 % owned
- 18 for 18 on drill results on "Ramsey Mine target"
- High-grade historic silver producer
- Silver mineralization is open-pittable at depths intersected to date
- All holes have hit thick zone of "disseminated silver"

Sycamore Canyon Gold-Silver Project

- 100 % owned
- 31 gpt Gold & 553 gpt Silver at surface
- 800 Meters long & 110 meters wide to date
- Maiden drill program planning in process

[View the Presentation](#)

Drilling Map

Our featured company is focused on the exploration and development of flake graphite in Quebec for the new green economy.

Lomiko is a Canadian-listed junior graphite exploration and development company. It's flagship asset is the La Loutre graphite deposit, located in Quebec, Canada about 120 km north-west of Montreal and 53 km southeast of the currently operating Imerys Graphite and Carbon Timcal Lac des Iles graphite mine.

The La Loutre deposit currently has an NI 43-101 compliant resource estimate completed in 2016, with 4.1 M tonnes of 6.5% flake graphite in the indicated category and 6.2 M tonnes of 6.1% flake graphite in the inferred category based on a cut-off grade of 3% in an open pit.

Lomiko plans on updating their resource estimate soon, integrating drilling data from 2019 in the property's Refractory Zone which features some notable, relatively long and high grade intercepts that would be expected to add tonnes and potentially improve the grade of the overall deposit.

Lomiko just completed the remainder of purchase and now owns 100% of the property. The resource estimate update is currently expected in Q1 of 2021.

In 2020, The Quebec Government released the Quebec Plan for Development of Critical and Strategic Minerals ("The Quebec Plan") which indicates graphite demand would likely increase 300-500% in the coming decades as more is used in the production of spherical graphite for anode portion of Electric Vehicle Lithium-ion batteries.

Colonial Coal Presentation

Torment 50 Growth Report

Colonial Coal's [CAD - TSX-V] chart is looking more positive. On March 25th it bottomed at exactly 55 cents which is the August 7, 2020 low on a previous dip. On March 26th buying flooded in, the stock popped .11 to close at .73 on 933,673 shares traded! There were 3 large offers that were sitting there for a while and they were all taken out. Someone selling through CIBC dumped 1/2 million shares (large offers) and several houses bought them all in one day (Haywood/Scotia/TD). Very positive in my opinion. From the latest INK Research report, David Emri has bought 673,000 shares between Feb.26th and March 25th. He controls 18.9M shares of Colonial Coal. Hopefully this is the start of a new uptrend as we wait for a possible sale.

CAD Chart by TradingView

Durango Resources tweeted a picture of some of their core via a March 26th tweet on twitter.

Visible gold is seen in the core and shareholders are waiting for the assay results.

The company's stock is having a difficult time getting traction. The stock is back at 8 cents after making two attempts to break the .12 level this year.

Durango announced on March 11th that they discovered native silver in one of their Trove property holes.

On April 1st they announced that Durango will begin an exploration program on their Discovery property, after it completes their Windfall Lake exploration program.

Durango's Discovery property is in the Troilus Mine area of Quebec. On March 23rd Troilus Gold \$TLG announced a take over of UrbanGold Minerals \$UGM.

Kenorland \$KLD recently had a big discovery in the Troilus area.

Tradingview

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

G lossary

Doji Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

Fibonacci Retracement

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

FLEM & DHEM

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policymaking body. It is responsible for formulation of a poilcy designed to promote stable prices and economic growth.

FOMO

Fear Of Missing Out

Naked Shorting

It is the illegal practice of shorting stock that is not borrowed.

Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

Short Squeeze

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.
