Gold Making Positive Moves!

Gold has moved up \$50/oz in the last two weeks.

The weekly chart above shows resistance in the \$1850 level which corresponds with swing lows last September. The chart also shows the upper level of the previous correction to the \$1676 double bottom.

We are also approaching a long term and a short term Fibonacci level at the \$1855ish price point.

The weakening US dollar is also helping gold.
The U.S. Non-Farm payrolls data last Friday came in weak and there is a constant buzz about inflation.

Getting through the \$1855US level may take a bit of time, but last week's positive \$63.19 candle shows great promise. New highs this year?

dynacor

ur featured company is focused on gold ore processing in Peru. They have been pouring gold in Peru since 1998.

Dynacor's 300 tonnes per day plant opened in 2016. The plant was designed for up to 600 tonnes per day expansion. On March 24th, 2021 the company announced that they would spend \$1.8Million to upgrade its ore processing capacity to 430 tonnes per day, a 43% increase. The construction completion date is scheduled for June 2021. The processing plant is located 5km off the main Pan American Highway in the hub of ASM high-grade operations (South Peru).

Dynacor's PX IMPACT® Clean Gold Program

- Environmental, social and ethical practices that respect human rights are an integral part of the PX IMPACT® clean gold program
- An investment premium is paid by PX Precinox customers on the PX IMPACT® clean gold program
- A lasting & positive contribution to the economic, social and environmental development of our mining communities
- Guarantees complete traceability across the gold ore supply chain coming from government registered miners
- 100% of the premium paid is invested into the ASM mining communities

Dynacor Business Cycle:

- Purchase high-grade ore at a discount to the spot price of gold from ASM client list consisting of over 500 mining groups
- 2. Weigh, assay & screen ore for gold content at our Veta Dorada plant
- 3. Ready for payment to ASMs within 72 hours from reception of ore
- 4. 5-8 days in processing the ASM ore to a gold dore bar level 99.5% pure
- Receive payment at gold spot price from our strategic partner, PX Precinox in Switzerland

Dynacor's 2021 financial forecast has the company having total sales of \$150M U.S. with an Earnings per Share of US\$0.18 (.23CAD) based on an average gold price of \$1850US/oz. The price of gold directly influences Dynacor's bottom line.

Dynacor is also looking at expanding into processing gold ore in Senegal and they are planning to drill their Tumipampa property in South Central Peru.

LOMIKO METALS®

ur featured company is focused on the exploration and development of flake graphite in Quebec for the new green economy.

Lomiko is a Canadian-listed junior graphite exploration and development company. It's flagship asset is the La Loutre graphite deposit, located in Quebec, Canada about 120 km north-west of Montreal and 53 km southeast of the currently operating Imerys Graphite and Carbon Timcal Lac des Iles graphite mine.

The La Loutre deposit currently has an NI 43-101 compliant resource estimate completed in 2016, with 4.1 M tonnes of 6.5% flake graphite in the indicated category and 6.2 M tonnes of 6.1% flake graphite in the inferred category based on a cut-off grade of 3% in a open pit.

Lomiko plans on updating their resource estimate soon, integrating drilling data from 2019 in the property's Refractory Zone which features some notable, relatively long and high grade intercepts that would expected to add tonnes and potentially improve the grade of the overall deposit.

Lomiko just completed the remainder of purchase and now owns 100% of the property. The resource estimate update is currently expected in Q1 of 2021.

In 2020, The Quebec
Government released
the Quebec Plan for
Development of Critical
and Strategic Minerals
("The Quebec Plan") which
indicates graphite demand
would likely increase
300-500% in the coming
decades as more is used in
the production of spherical
graphite for anode
portion of Electric Vehicle
Lithium-ion batteries.

BZ / GTR

EDITOR'S Watchlist

Benz Mining Presentation

B enz Mining \$BZ #TSXV continues to trade between .70 and .90 as the company waits for assay results. On April 23rd they announced that a 2nd drill rig has been delivered to the Eastmain project. Samples from previous drilling are on there way to Australia for PhotonAssay evaluation.

Benz also announced an update on May 5th about FLEM surveys and more in core visible gold. 50,000m of drilling will provide lots of news this year. Unfortunately labs are slow due to Covid so we are forced to exercise patience. This patience could also benefit us as we may see a much higher gold price in 6 months.

April 23rd News - 2nd Drill Rig

May 5th News - Visible Gold

BZ Chart by TradingView

atling Exploration \$GTR #TSXV continues to trade on fairly light volume. As you can see by the chart, 2021 has had a tight range and it keeps pressing against the .51 resistance point. I think it is only a matter of time before it takes off.

I think patience will be rewarded here. As I stated in the last newsletter:

- 140,000m of drilling that will go into the next resource estimate coming late 2021.
- The deposit is actually 3 connected deposits stretched over 4.5km.
- The deposit is shallow and located in Ontario, Canada.
- Drill intercepts that are over 100m long including the last hole of 200m!

How many million oz of gold are they going to prove up? Current market cap is just \$14.2 Million.

Tradingview

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

Cossary

Doji Candle

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

Fibonacci Retracement

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

FLEM & DHEM

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

FOMC

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policymaking body. It is responsible for formulation of a poilcy designed to promote stable prices and economic growth.

FOMO

Fear Of Missing Out

Naked Shorting

It is the illegal practice of shorting stock that is not borrowed.

Shorting

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

Short Squeeze

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.
