## WEEKLY DOW JONES CHART

### PM Pampa Metals

**May 24th** - Pampa Metals Starts IP Geophysical Program at its Block 4 Project to Refine Drill Hole Locations at Buenavista and to Explore Post-Mineral Cover for Further Drill Targets

FULL NEWS RELEASE

### How low are we going?

Since our last newsletter nothing much has changed. Stocks are moving lower and support levels are being breached.

The rumor is that the U.S. Fed's interest rate decision on Wednesday may be a more surprising .75% hike. Buckle up for lots of volatility!

Have a good week.

### AZS Arizona Silver Exploration

**May 25th** - Arizona Silver Extends High Grade Zone at Philadelphia Project - Drills 2.26 Metres at 11.81 g/t Gold and 39.31 g/t Silver within 31.01m at 2.38 g/t Gold, 10.58 g/t Silver

## WHAT ARE THE FIVE MAJOR TYPES OF RENEWABLE ENERGY?

**WIND**

6.6% global electricity generation (2021)

Wind flows over the blades of a wind turbine, creating mechanical power by turning the blades.

1

2

The blades are connected to a drive shaft that turns an electric generator to produce electricity.

**GEOTHERMAL**

<1% global electricity generation (2021)

As the water reaches the surface, it boils over into steam, which rotates a steam turbine.

1

2

3

Hot water from underground reservoirs is pumped using pipes or wells.

The turbine is connected to a generator that produces electricity.

## Snapshot

**Copper:** One of the greatest growth profiles and demand / supply metrics

**Gold:** One of most attractive high-value metals

**Chile:** Elephant country for major economic copper deposits

**People:** Highly experienced with execution ability & track record

**Projects:** Portfolio breadth & depth – along proven mineral belts of Chile

**Current focus:** 4 projects – with 2 additional projects subject to 3rd-party expenditure via JV

**Progress:** Rapid progress including 2 drilled projects – further drilling planned for 2022

**JV Funding:** 2 projects subject to 3rd party expenditures – drilling started in January 2022

INVESTOR SUMMARY

FACT SHEET

NEWS RELEASES

Our featured company owns a highly prospective 62,000-hectare portfolio of eight projects for copper and gold located along proven mineral belts in Chile, one of the world's top mining jurisdictions. The Company has a vision to create value for shareholders and all other stakeholders by making a major copper discovery along the prime mineral belts of Chile, using the best geological and technological methods.

### The Projects - Current Priorities

#### Cerro Buenos Aires (7,600 Ha):

- Located south of Spence / Sierra Gorda district
- Recent drilling through post-mineral cover has vectored towards porphyry target

#### Redondo-Veronica (6,600 Ha):

- Located north of giant La Escondida district
- Recent drilling gives line of sight to 2 deep porphyry targets

#### Block 4 (6,800 Ha):

- Located south of giant La Escondida district
- Quartz-vein stockwork – coincident with magnetic high – partial post-mineral cover

#### Block 3 (10,100 Ha):

- Located south of giant La Escondida district
- Post-mineral cover - adjacent to 2 historically drilled porphyry targets – magnetic anomalies

#### Arrieros (13,700 Ha):

- Large, post-mineral covered property situated between Chuquicamata and Centinela districts
- Magnetic and IP anomalies

#### Block 2 (3,300 Ha):

- Structural target – pending exploration advances

### Projects subject to 3rd Party Expenditures (Austral Gold Ltd)

#### Morros Blancos (7,300 Ha):

- HS systems – maar-diatremes – vuggy silica
- Drilling started (January 2022)

#### Cerro Blanco (6,500 Ha):

- Small lithocap outcrop coincident with magnetic high. Extensive post-mineral cover

**AZS**

**CORPORATE SPONSOR**

**O**ur featured company is a young exploration company focused on exploring gold-silver properties in western Arizona and Nevada. The flagship asset is the Philadelphia property. In addition to the Philadelphia project, the Company recently received a positive Record of Decision on its Notice of Intent to drill an initial twelve exploration holes for Carlin-type targets on its recently acquired Silverton gold-silver property. Drilling there will be scheduled as time and equipment allow.

## The Philadelphia Project 3000 meter Drill Program Underway

- 100% owned/controlled - historic high grade gold producer
- In 2021 Company acquires control over +3 kms strike length
- Drilling provides multiple intercepts of high grade vein
- 33.56 gpt Au, 54.7 gpt Ag over 2.35 metres
- 9.26 gpt Au, 79.8 gpt Ag, 344 gpt Be over 10.76 m.
- 23.47 gpt Au, 97.2 gpt Ag over 2.3 metres
- Drilling discovers wide low grade mineralization in multiple holes
- 1.34 gpt Au, 5.78 gpt Ag over 115 metres
- 1.57 gpt Au, 7.64 gpt Ag over 103.7 metres

### The Silverton Gold-Silver Project

- Carlin/stockwork gold system
- 100% owned/controlled - 1540 acres
- Past drill results contain 1 to 16 g/t gold

### The Ramsey Silver Project

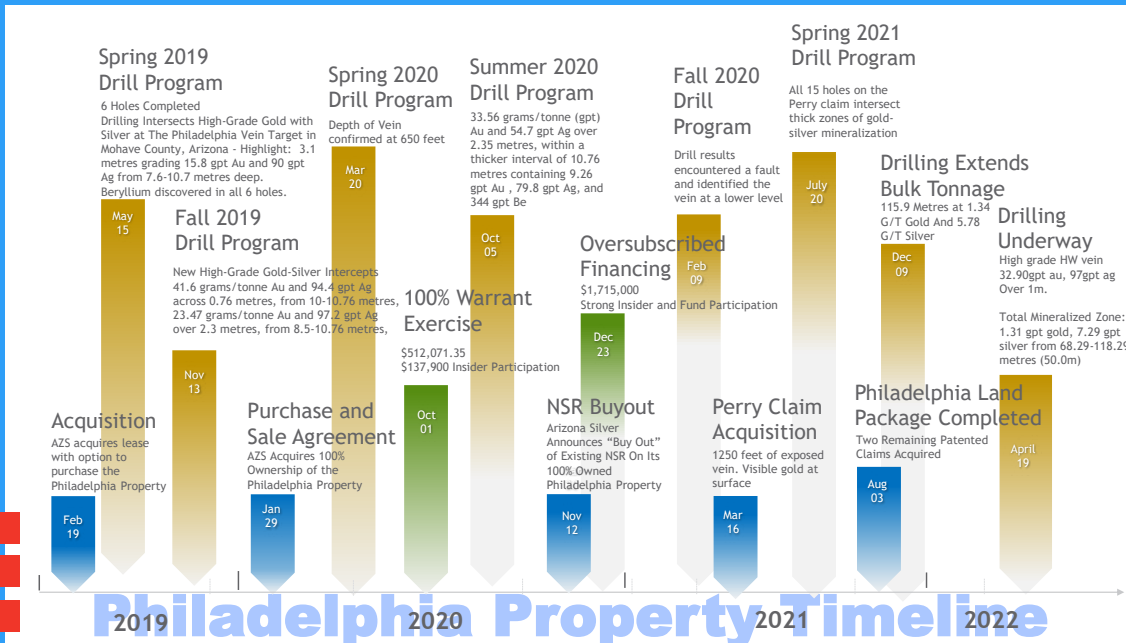

- 100 % owned
- 18 for 18 on drill results on "Ramsey Mine target"
- High-grade historic silver producer - 40oz/ton
- Silver mineralization is open-pittable at depths intersected to date
- All holes have hit thick zone of "disseminated silver"

### Sycamore Canyon Gold-Silver Project

- 100 % owned
- 31 grams Gold and 553 grams Silver at surface
- 800 Meters long and 110 meters wide to date
- Maiden drill program planning in process

### Company Highlights

- Tight share structure
- Company founded November 2016
- Insider participation on every raise
- Insiders hold 80% of outstanding warrants

CORPORATE SPONSOR

AMERICAN MANGANESE INC.

A Critical Metal Company Focusing on Recycling Lithium Ion Electric Vehicle Batteries

With planned operation start-up in February 2022, American Manganese's 500 kg/day cathode waste RecycLiCo™ plant is poised to become the first hydrometallurgical demonstration facility in North America for lithium-ion battery recycling and upcycling.

Our featured company is a critical metal company focused on the recycling of lithium-ion batteries using their RecycLiCo™ Patented Process. The process offers a closed-loop and environmentally friendly hydrometallurgical solution for the recycling of cathode materials from spent lithium-ion batteries and battery manufacturing scrap. The Company achieves high recovery and purity of materials such as lithium, cobalt, nickel, manganese, and aluminum from cathode chemistries such as NCA (lithium nickel cobalt aluminum oxide), NMC (lithium nickel manganese cobalt oxide), LCO (lithium cobalt oxide), and LMO (lithium manganese oxide). The RecycLiCo™ patented process aims to produce materials as high-quality cathode precursor, that could be directly integrated into the re-manufacturing of battery cathodes using minimal processing steps.

Patented Technology & Publications

- The Company holds patents in Canada, US, China and South Africa for production of electrolytic manganese metals from low-grade manganese deposits
- Publication in the peer-reviewed Journal of the Electrochemical Society – Experimental Study on Recycling of Spent Lithium-Ion Battery Cathode Materials

Global Opportunity

- Bloomberg New Energy Finance projects that electric vehicles will surpass internal combustion engine vehicle sales before 2040
- Benchmark Minerals Intelligence is tracking 181 Battery Manufacturing Megafactories with over 3,000 GWh of capacity expected in the coming decade
- Proposed phase out of internal combustion vehicles in multiple countries and cities
- New USMCA trade agreement are creating a requirement for advanced batteries to originate from North American for use in future U.S. electric vehicles

Strong Market Fundamentals

- Closed-loop and sustainable lithium-ion battery recycling process
- Low operating cost (estimated reagent consumption cost of \$1/kg of cathode material processed)
- Low energy consumption & no high heat
- No landfill waste or toxic fumes
- High extraction and purity potential of lithium, nickel, cobalt, manganese, and aluminum

Battery Minerals are Critical Minerals

- U.S. Government published a Critical Minerals List, with 35 minerals and metals considered critical to the “national economy and national security” and cobalt, lithium, and manganese are included in the list
- Executive Order signed by the President of the United States, declaring a National Emergency to expand domestic mining industry for critical minerals

**JUNE 7TH NEWS:**

**HIGHEST GRADE GOLD TO  
DATE CONFIRMS EASTMAIN'S  
POTENTIAL TO HOST A  
STANDALONE GOLD PROJECT**

**SEIZING A BELT-SCALE  
OPPORTUNITY - INVESTOR  
PRESENTATION**

**B**enz Mining (BZ TSX-V) closed .53 yesterday and continues to trade low volume. Benz put out another update last Tuesday. From the news:

**“HIGHLIGHTS:**

- Results for remaining diamond holes from 2021 exploration campaign received
- Assays return high-grade gold from all zones of the Eastmain system identified to date
- Best intercepts include:
  - 1.0m at 365.5g/t gold from 81.0m (EM21-229, E Zone, highest grade to date for Benz)
  - 6.6m at 9.8g/t gold from 643.9m including 1.1m at 36.7g/t gold (EM21-230, D Zone)
  - 6.2m at 9.7g/t gold from 674.3m including 1.0m at 23.4g/t gold (EM21-182, D Zone)
  - 8.4m at 4.6g/t gold from 578.0m including 1.0m at 26.0g/t gold (EM21-203, C zone)
  - 6.8m at 4.5g/t gold from 458.5m including 1.3m at 8.7g/t gold (EM21-232, D Zone)
  - 3.0m at 9.8g/t gold from 345.0m including 0.8m at 35.8g/t gold (EM21-207, E zone)
- Confirmed discovery of Upper Horizon, a new high-grade zone between Kotak and the Mine Trend, adding one more discovery to Benz's track record
- Consulting geologist Marcus Harden (ex-Bellevue Gold) to lead structural interpretation targeting structurally controlled high-grade shoots in the next round of drilling”

**AND:**

**“2022 Exploration Update**

From January to May 2022, Benz drilled over 17,000m of core for **43 diamond drillholes** into a range of regional targets identified by electromagnetics and a historical 3D induced polarisation. Most of these targets are located within the 12km of strike of greenstone belt surrounding the Eastmain deposit.

Benz also drilled recently identified FLEM conductors at the Southern Anomalies. Results of visual mineralisation from the drilling at the Southern Anomalies were reported on 18 May 2022.

Core from the 2022 drilling campaign is still being processed and Benz is looking forward to updating the market with progress from the 2022 drilling.”

I'm also looking forward to the Lithium grades of the drill holes put into the spodumene pegmatites. Lots of news coming this year.

Benz also added more expertise to the exploration:

“We are thrilled to have secured the expertise of Marcus Harden. Marcus has a lot of experience in similar high grade gold systems, including the Bellevue Gold project in Western Australia, which Benz has used as an analogue for its exploration methodology.”

**D**urango Resources (DGO TSX-V) closed at .065 Yesterday. The company recently announced a \$515,000 private placement and quickly closed it. They now have announced hiring of a driller and yesterday that a drill is being moved to the drill site.

“Vancouver, BC - TheNewswire - June 13, 2022 - Durango Resources Inc. (TSX V: DGO) (Frankfurt:86A1) (OTC:ATOXF), (the “ Company “ or “ Durango “) announces that further to the news of June 2, 2022, the Company has mobilized the drill to site for its exploration drilling program on its wholly owned Discovery Property (the “ Property “) in Quebec.

The Discovery Property is in the highly prospective James Bay Territory, 100km north of Chibougamau, Quebec in the Frotet-Evans greenstone belt.

Durango has planned a 1,500m exploration drill campaign in the area where recent rock, channel and backpack drill sampling at surface have returned the following gold anomalies:

- 46.64 g/t Au in chosen rock sample as per October 7, 2021, news release;
- 9.25 g/t Au over 1m in channel sampling as per January 17, 2022, news release; and
- 1 g/t Au over 2m in backpack drilling as per April 20, 2022, news release.

Marcy Kiesman, CEO of Durango stated, “We are excited to test drill the Discovery Property at depth since the results at surface have been very interesting. We are also planning an exploration crew to visit the Discovery Property to conduct mapping the area near the gold anomalies.”

From the look of the market, it is going to take a lot of buying volume to get it past the .09 barrier.

The Editor: [Editor@MarketTrendNews.com](mailto:Editor@MarketTrendNews.com)

Market Trend News has been featuring small cap companies for 29 years. The newsletter started out as a print publication and is now distributed over the web.

We feature micro cap and small cap companies that want to spread the word about their company and potential.

Our featured companies come from a wide variety of sectors such as mining, oil and gas, technology, biotech and cannabis.

The Corporate Sponsors pages (featured companies) are companies who have paid for a social media advertising package with Market Trend News Inc. Market Trend News Inc may have a stock position in the company being featured.

The Editor's Watchlist section contains featured companies that the Editor has positions in or is thinking of buying positions in. Consider it a swing trader's blog and in no way a recommendation to buy or sell securities. He is not an advisor. Please do your own research and consult a licensed advisor before taking action.

You are responsible for your trades.

**S**ubscribe

**Market Trend News Subscription**

Thanks to our corporate sponsors, we are able to cover our costs and offer our newsletter as a free subscription to the reader.

**Platinum Subscription**

There are two levels of subscriptions. If you are seeing the Platinum logo in the top left hand corner of the first page, then you are Platinum Subscribed. The benefits are that you get the newsletter first. We are also working on other supplementary content that will be offered to Platinum Subscribers first and maybe exclusively.

If you are NOT Platinum subscribed, you can upgrade by clicking on the Subscribe link above or you can remain on the regular list.

**Unsubscribing**

We do not want to send to people who are not interested. Please use the single click removal link at the bottom of the email that was sent to you. You will be instantly removed.

**L**inks

**Tradingview**

Tradingview is an excellent online charting platform as well as a social network for traders and investors to exchange ideas.

**G**lossary

**Diamond Hands**

Slang term for an investor who is ready to hold a position for the end goal, despite the potential risk, headwinds and losses.

**Doji Candle**

Doji Candles look like a cross because the financial instrument's open and close for the time period are close to equal.

**Fibonacci Retracement (Fib)**

These are levels in the chart where support and resistance are likely to occur. The levels are 23.6%, 38.2%, 61.8%, and 78.6%. 50% is often added but is not an official level. The levels are calculated from two points chosen by the user, usually an extreme low and an extreme high.

**FLEM & DHEM**

Fixed Loop Electromagnetic and Down Hole Electromagnetic Surveys

**FOMC**

The Federal Open Market Committee consists of 12 members and is the U.S. Fed's monetary policy making body. It is responsible for formulation of a policy designed to promote stable prices and economic growth.

**FOMO**

Fear Of Missing Out

**Naked Shorting**

It is the illegal practice of shorting stock that is not borrowed.

**Nonfarm Payrolls**

Is an official statistic released by the U.S. department of labor, usually on the first Friday of the month. It is a measure of the number of workers in the U.S. excluding farm workers and those employed in private households or non-profit organisations.

**Shorting**

Borrowing stock, selling it in the market to hopefully buy it back at a lower price, making profit from the difference in price, and then returning the borrowed stock.

**Short Squeeze**

When a company's stock starts to quickly rise because people shorting the stock are trying to cover their losing positions to prevent further loss.

**YOLO**
