## **DNG** Dynacor Gold Mines

Dynacor Announces Shareholders Annual Meeting Voting Results and Appoints Expert Geologist and Former Gold Mine Manager Eddy Canova to Advisory Committee - June 30th

Dynacor Gold Mines Inc. (TSX: DNG) announced its monthly dividend. The declaration of a dividend payment of C\$0.0067 per common share will be payable on July 16, 2021. - June 28th

## **LMR** Lomiko Metals

Lomiko Metals has posted a new 16 page investor presentation featuring the rise of electric cars and the need for critical metals like graphite.

## Gold Bounces Off Support

After losing almost \$100 US/oz on Jerome Powell's Fed speech on June 16th, Gold has retested the \$1765 level again, and bounced. Last week Gold gained back about 1/2 the drop and closed at \$1808 US/oz on Friday.

The \$1765 level is significant support, shown by all the touches over the past year (red circles on the chart). I was glad to see it bounce again. Gold is now challenging the upper side (green circle) of the previous downward correction (red channel). If it breaks through the next resistance it should trade in the \$1850 range then we are over \$1900 again.

It should be an interesting week because the EUR/USD currency pair has also bounced off a support line and we will see if US dollar weakness continues. The DJ30 is also poised to set new highs.

## About Dynacor

- An industrial gold ore processor
- Committed to shareholder returns through monthly dividend stream and stock buyback program
- Engaged in metal sales through the processing of ore purchased from the ASM (artisanal small-scale mining) industry
- Environmentally and socially responsible gold sales through PX IMPACT® gold program
- Fine luxury watchmakers pay premiums for certified clean PX IMPACT® gold
- Decades of experience servicing the ASM industry
- Potential to create value through the drill bit at 100% owned Tumipampa gold project
- \*US\$16.6 million (C\$22.1 million) in cash and debt-free

Our featured company is focused on gold ore processing in Peru. They have been pouring gold in Peru since 1998.

Dynacor's 300 tonnes per day plant opened in 2016. The plant was designed for up to 600 tonnes per day expansion. On March 24th, 2021 the company announced that they would spend \$1.8Million to upgrade its ore processing capacity to 430 tonnes per day, a 43% increase. The construction completion date is scheduled for June 2021. The processing plant is located 5km off the main Pan American Highway in the hub of ASM high-grade operations (South Peru).

### Dynacor's PX IMPACT® Clean Gold Program

- Environmental, social and ethical practices that respect human rights are an integral part of the PX IMPACT® clean gold program
- An investment premium is paid by PX Precinox customers on the PX IMPACT® clean gold program
- A lasting & positive contribution to the economic, social and environmental development of our mining communities
- Guarantees complete traceability across the gold ore supply chain coming from government registered miners
- 100% of the premium paid is invested into the ASM mining communities

### Dynacor Business Cycle:

1. Purchase high-grade ore at a discount to the spot price of gold from ASM client list consisting of over 500 mining groups
2. Weigh, assay & screen ore for gold content at our Veta Dorada plant
3. Ready for payment to ASMs within 72 hours from reception of ore
4. 5-8 days in processing the ASM ore to a gold dore bar level 99.5% pure
5. Receive payment at gold spot price from our strategic partner, PX Precinox in Switzerland

Dynacor's 2021 financial forecast has the company having total sales of \$150M U.S. with an Earnings per Share of US\$0.18 (.23CAD) based on an average gold price of \$1850US/oz. The price of gold directly influences Dynacor's bottom line.

Dynacor is also looking at expanding into processing gold ore in Senegal and they are planning to drill their Tumipampa property in South Central Peru.

Drilling Map

**O**ur featured company is focused on the exploration and development of flake graphite in Quebec for the new green economy.

Lomiko is a Canadian-listed junior graphite exploration and development company. It's flagship asset is the La Loutre graphite deposit, located in Quebec, Canada about 120 km north-west of Montreal and 53 km southeast of the currently operating Imerys Graphite and Carbon Timcal Lac des Iles graphite mine.

The La Loutre deposit currently has an NI 43-101 compliant resource estimate completed in 2016, with 4.1 M tonnes of 6.5% flake graphite in the indicated category and 6.2 M tonnes of 6.1% flake graphite in the inferred category based on a cut-off grade of 3% in an open pit.

Lomiko plans on updating their resource estimate soon, integrating drilling data from 2019 in the property's Refractory Zone which features some notable, relatively long and high grade intercepts that would be expected to add tonnes and potentially improve the grade of the overall deposit.

Lomiko just completed the remainder of purchase and now owns 100% of the property.

Benz Mining July 7th  
News Release

**B**enz (BZ TSX Venture) closed Friday at .78. On July 7th they put out an update that the samples they shipped to Australia for PhotonAssay are now being processed at the lab.

**PhotonAssay of 2020 Core Underway in Perth - Highlights:**

Reject samples from the 2020 drilling campaign have arrived at MinAnalytical in Perth, Western Australia for analysis by PhotonAssay

Samples had been integrated in the laboratory schedule ahead of delivery to allow for immediate start at reception and analysis has started

Whole rock analysis to be conducted capturing visible gold, observed in core and potentially not reflected in standard fire assays

**Historical analysis from 2010/11 programs highlighted that fire assays under called grades by on average 34% compared with screen fire assays**

Analysis run in conjunction with large scale heterogeneity test quantifying the nature of the high-grade gold at the Eastmain deposit

Understanding and quantifying the nature of high-grade gold mineralisation will improve future resource estimate and confidence

If the PhotonAssay method can prove that the grade is higher than what the historical resource states then we would need a re-evaluation of the deposit. I can't wait till the Canadian lab starts providing us with assays and the PhotonAssays out of Australia are announced. The two drill rigs don't stop, eventually the news has to come!!

[Benz Mining Presentation](#)

[Eastmain Project - Video](#)

**C**olonial Coal (CAD TSX Venture) had a huge week last week. After touching .50 for a low on June 22nd, the company's stock has rebounded quickly, closing at .74 cents on Friday! Volume was 548,353 on Friday and we will see if the demand continues this week.

There were some 100K+ offers on Friday and they were taken out quickly. CIBC continues to be the main seller, the brokerage house has a net sell total of 1/2 million shares over the last month.

As I have stated in past newsletters, the owners of the majority of the company's stock can be counted on your 10 fingers. The stock moves like it does because I think there is more and more stock being put away. This is a waiting game and I think there are companies/institutions trying to position.

I would like the pressure to ramp up even more with some price appreciation over the 52 week high into the \$1+ range. The price of coking coal adds additional pressure because it continues to go higher.

How much is ~700MT Coking Coal in the ground worth?  
\$1, \$2, \$3 USD/MT ?

The share price isn't even close to where the value is. Currently at .74 and 184M fully diluted shares, the coal is being valued at about **.20 US/MT**.

Sounds ridiculous doesn't it?
