PJO Project One Resources

Our new featured company is a junior mineral exploration company, engaged in the business of acquiring, exploring and developing natural resources properties. Currently, Project One Resources holds a 100% interest in the Aura Property located in south western B.C.

The company recently entered into a non-binding letter of intent for the proposed acquisition of the advanced stage Tassawini Gold Property and the Harpy Gold Property, both located in Guyana, South America. Upon a successful closing of the transaction, the company will be renamed Alerio Gold Corp.

LMR Lomiko Metals

Lomiko Metals Inc. Delivers Positive PEA for La Loutre Graphite Project

“La Loutre has shown it has the potential to become a highly profitable graphite mine in one of the most prolific producing regions in Canada. The La Loutre PEA was produced by the Ausenco team, one of the most experienced and reputable engineering firms working on mining projects in Canada. With further drill programs, we will continue to add to and upgrade resources as we seek to move the project forward towards production,” said A Paul Gill, President, CEO and director, Lomiko.

Gold is one Volatile Metal!

Gold was down on Friday in reaction to a positive non-farm payroll report (US \$ gained strength). Gold closed Friday at the \$1760US support level and at the long term uptrend channel (green) lower level.

Gold opened on Sunday with a massive \$80US/oz sell off. It broke support and hit the next support level at \$1678 Us/oz and then back bounced hard. It is currently trading at \$1737US/oz.

I don't think the Gold volatility is going away anytime soon. Buckle up Buttercup!

Have a Great Week!

ARE COPPER PRICES IN A SUPERCYCLE? A 120-YEAR PERSPECTIVE

DR. COPPER?

A 120-YEAR PERSPECTIVE

Market analysts call copper the Doctor, as its prices generally indicate the health of the economy.

Copper prices have rallied in recent months, with some analysts talking of a new supercycle — a sustained period of economic expansion, usually driven by robust demand, that can last for decades.

Typically, when the price of copper starts and continues to rise, it could mean the beginning of a new supercycle.

MARKETS TEND TO BE CYCLICAL, USUALLY WITH 5 YEAR CYCLES DIVIDED IN FOUR STAGES

Investment Highlights

- Proven Management with decades of experience in the Guiana Shield
- Tassawini Gold Project hosts an Historical Resource of 499,000 oz. (SRK, 2010) Non 43-101
- \$34M spent previously with mineralization open in several directions
- Licensed for mining
- Large influx of capital into the region for exploration and production
- Building a Guyana focused producer with exploration upside

Our featured company is a gold explorer and is currently in the process of acquiring the Tassawini Gold Project in Guyana.

The Tassawini Project

- 1381 hectares
- 120 person camp
- 650m commercial airstrip
- Tidal river capacity for 1,000 tonne barges
- ~100km to Atlantic Ocean

Deposit

- Medium Scale mining permits issued in 2018; renewable in 5 year cycles.
- Extensive historic Diamond and RC drilling since 2004:
 - 47,509 meters in 1,279 holes
- Metallurgical testing 73-97% , mostly in saprolite.
- Additional Regulatory Approvals: Only completion of EIS necessary for production.
- Full government backing. Historical Amerindian claims defeated in two court rulings in 2013 and 2017.
- Local government support includes setup of a local police station to protect land

Historical Resources (non 43-101)

- Indicated: 437K oz Gold
- Inferred: 62K oz Gold

Upside potential with structural, geological, geochemical and geophysical targets

Potential for MultiMillion Ounce Gold Endowment

The Harpy Property

- Project located in the prolific Guiana Shield of South America which contains over 110 MM oz Au inventory
- Adjacent to Guyana Goldfields producing over 220,000oz per year. Recently purchased by Zijin Mining for \$323 Million.
- Located on the Cuyuni River for ease of access, barging personnel, exploration and drilling equipment.
- Significant artisanal mining throughout the Company's property, identifying early exploration programs.
- 100% owned by Harpy with all exploration and environmental permits in hand.

The Aura Project

Project One's wholly owned Aura Property, is made up of 2,706 hectares of contiguous claims and is located approximately 150 kilometers east of Vancouver, British Columbia. It is close to two recently operated mines and several high profile exploration properties.

Noranda's historic work returned fifty-one (51) continuous 1.5 metre chip samples collected along the trend of the anomalous outcrop of quartz breccia that returned consistently anomalous levels of gold. The average over 76 metres was 514 ppb (or 0.514 g/t) gold, including a 13.5 metre section of 1034 ppb (or 1.034 g/t) gold.

LOMIKO METALS®

Our featured company is focused on the exploration and development of flake graphite in Quebec for the new green economy.

Lomiko is a Canadian-listed junior graphite exploration and development company. It's flagship asset is the La Loutre graphite deposit, located in Quebec, Canada about 120 km north-west of Montreal and 53 km southeast of the currently operating Imerys Graphite and Carbon Timcal Lac des Iles graphite mine.

The La Loutre deposit currently has an NI 43-101 compliant resource estimate completed in 2016, with 4.1 M tonnes of 6.5% flake graphite in the indicated category and 6.2 M tonnes of 6.1% flake graphite in the inferred category based on a cut-off grade of 3% in a open pit.

Lomiko plans on updating their resource estimate soon, integrating drilling data from 2019 in the property's Refractory Zone which features some notable, relatively long and high grade intercepts that would expected to add tonnes and potentially improve the grade of the overall deposit.

Lomiko just completed the remainder of purchase and now owns 100% of the property.

August 6th, 2021 News:

Gatling Delivers Robust Drilling Update: 7.7 g/t Au over 17.0m Extending the Bear Deposit 150m Up Plunge and Additional Positive Drilling Continues at the Fernland Deposit

August 2nd, 2021 News

New High Grade Gold Shoot Identified at North West Zone at Eastman Gold Project

Eastman Project - Video

Benz Mining Presentation

Gatling Exploration (GTR TSX Venture) put out news after market on Friday. They updated their current exploration and announced some drill results.

Drill Core Highlight: 7.7 g/t Au over 17.0m including 25.3g/t Au over 4.0m

They also announced that there will be no more financing tranches, the financing is complete. Management comments from the release:

“Jason Billan, President and CEO for Gatling, commented, “The 25,000 m exploration program outlined at the beginning of the year is nearly 90% complete and has continued to deliver impressive results across the Fernland and now Bear deposits, which bode well for the upcoming mineral resource estimate at the Larder project. One of the primary objectives of our program this year was to close the gap between two main lenses at Bear which begin at roughly 100 m below surface and the core of the Bear deposit, which commences at approximately 500 m depth. We have now accomplished this significant achievement in a timely manner. In addition, Fernland continues to grow in size following the completion of its drill program, demonstrating further upside at depth and beneath a potential starter pit. We look forward to updating the market during a catalyst-rich second half of the year for the Company, while being laser focused on meeting or exceeding our 2021 goals.”

Nathan Tribble, Vice President Exploration for Gatling, commented, “These recent results from the ongoing drill program at the Bear deposit are very significant in connecting the high-grade core of the deposit to lenses identified in our 2019 drill campaign by tracking the plunging mineralized zones. It is expected that these latest holes will add a large amount of volume and ounces to our upcoming resource update as the gap prior to these drill holes was 300 m in strike and 150 vertically. Having also completed our very successful program at the Fernland deposit, we have now shifted gears to continue to explore aggressively at our Kir Vit prospect, by targeting the high-grade shear zones identified last year in our outcrop stripping campaign.”

Read the complete release.

In my opinion Gatling Resources is showing deep value at current market price.

Benz Mining (BZ TSX Venture) continues to trade between .70 and .80. The stock often has a 5+ cent spread. Volumes are relatively low and the stock had almost no reaction to its latest news which contained an exploration updated with some drill results. The company is also adding a third drilling rig by the end of August.

“Assays for the first 17 holes of 2021 received - assay results include:

3.0m at 16.6g/t gold including 1.5m at 32.8g/t gold (EM21-143)
7.8m at 8.7g/t gold including 1.0m at 32.6g/t gold (EM21-146)
6.0m at 3.6g/t gold including 1.0m at 10.2g/t gold (EM21-145)
3.0m at 5.2g/t gold including 1.0m at 15.0g/t gold (EM21-159)
6.6m at 3.1g/t gold (EM21-158)”

“CEO, Xavier Braud, commented: “We are glad to finally be able to release assay results from Eastmain, especially when they are great results. DHEM of historical holes at NW Zone had showed us many undrilled conductors. We drilled them and now we know that NW Zone is mineralised and presents the exact same characteristics as A, B and C Zones and poses as a new high-grade zone of the Eastmain deposit. This first pass scout drilling is wide spaced with drilling centres 100m apart and more. We have identified mineralisation over a large 400x 400m area and, more importantly, we have clearly identified two mineralised parallel horizons, both of which are proving to be gold bearing.

Eastmain is delivering above expectations and our exploration methodology utilising electromagnetics to guide discoveries continues to be extremely successful. We have identified conductors over a strike length of 6km and, to date, we haven't drilled a single conductor which has not returned the right geology. Every target we drill bring more information and we are gradually unlocking the full potential of the Eastmain deposit.”
