REPORTING ON THE MARKETS SINCE 1993

[Subscribe to Platinum](#)

AUCU Inflection Resources Ltd

Our new corporate sponsor is focused on exploring for gold and copper in Australia. The company has strong institutional support, district scale land positions (over 8,000 Km² of licenses in New South Wales), and a technically driven team of mine-finders with capital market expertise.

ROVR Rover Metals Corp

Our new corporate sponsor is a natural resource company specializing in precious metals in North America. Rover is currently advancing the gold potential of its projects located in the Northwest Territories of Canada at the 60th parallel. Rover has 100% ownership of its core gold assets.

LMR Lomiko Metals

August 27th: Lomiko Retains Hemmera for Environmental Base-line Studies and Bridge© for Community Consultation Meetings on La Loutre Graphite Project

“Lomiko is focused on investigating the best methods of handling mineralized and nonmineralized material for the duration of the project and remediation of the area as quickly as possible.” Stated A. Paul Gill, CEO of Lomiko

PJO Project One Resources

Project One Resources is currently closing its over subscribed \$1.35 million financing. The Company previously announced on June 9, 2021, that it had entered into a Letter of Intent to acquire two gold mining properties in Guyana, South America, the Tassawini and Harpy Gold properties. The proceeds of this Offering will be used to cover costs associated with the closing of the transaction as well as general working capital.

Gold is Making Moves Higher

I last wrote about Gold in our August 9th newsletter after it had hit support at the \$1678 US/oz level. It has since rebounded and blown through the \$1760 resistance and we are now at the \$1830 resistance level.

Gold has touched this \$1830 level several times since July and when it breaks we should be on our way to \$1874 then \$1915.

Global uncertainty isn't going away anytime soon. New strains of Covid not only stress world health systems but Covid related policy is also dividing people. Canada is going through an election, the US recently pulled out of Afghanistan, and we all wait to see how the US Federal Reserve will react to all the data.

When will Gold push for new all time highs?

Have a great week!

Investment Highlights

Expansion resource drilling underway to convert and increase historical resource to NI 43-101 compliant.

C\$2,400,000 raised for drilling in Q2-2021.

Testing untested iron formation nose hinges which could host significantly higher-grade gold intercepts.

Four historic, at surface, proven brownfields gold zone targets remain untested by Rover.

Gold at Cabin is hosted in steeply-dipping folded iron formation. Only the top 100m of the iron formation has been drilled. The iron formation extends for at least 15km in length at surface (greater length if folding taken into consideration).

12 additional greenfields drill targets at the Cabin Gold Project.

2 additional nearby projects with similar geology (Slemon Gold & Camp Gold claims).

Our featured company Rover Metals is a natural resource exploration company specialized in North American precious metal resources. Rover is currently advancing the gold potential of its projects located in the Northwest Territories of Canada at the 60th parallel. Rover has 100% ownership of its core gold assets.

14 million ounces of gold has been historically mined in the region.

The Cabin Gold Project

- 145km Road to city (Yellowknife, NT)
- Hydro (Strutt Lake Hydro, NT Power Corp)
- Four junior gold miners 5-10 years ahead of Rover in the mine building cycle.
- Readily available skilled mining labor in surrounding towns and city.

Iron Formation Hosted Gold

- Three land parcels of gold claims:
 1. Cabin Gold (2021 NEW drilling)
 2. Slemon Gold
 3. Camp Gold
- CAD\$10MM invested into exploration

Comparable Historic Gold Mines

- Lupin Gold Mine, NT, Canada
- Homestake Gold Mine, S. Dakota, USA

ARROW ZONE - HISTORIC & NEW HIGH-GRADE GOLD DRILL INTERCEPTS

Historic 86-28: 11.74g/t Au over 16.0m	New Hole CL-20-01: 7.94g/t Au over 22.01m
Historic 86-28: 11.74g/t Au over 16.0m	New Hole CL-20-08: 13.6g/t Au over 32.0m
Historic 86-12: 15.77g/t Au over 8.02m	New Hole CL-20-01: 7.94g/t Au over 22.01m
Historic 86-12: 15.77g/t Au over 8.02m	New Hole CL-20-08: 13.6g/t Au over 32.0m
Historic 86-10: 8.31g/t Au over 14.7m	New Hole CL-20-03: 6.97g/t Au over 13.7m
Historic 86-11: 6.12g/t Au over 7.1m	New Hole CL-20-03: 6.97g/t Au over 13.7m

Q3-2021 Drilling Underway

Highly Sulfidized (>30% pyrite) Drill Targets

- ~3,000 meter drill program underway
- High-grade gold at the Arrow Zone is associated with >30% sulfidization (pyrite)
- NEW Drill Targets were selected based on pyrite content:
 - o The Beaver Zone historic drilling reported >30% pyrite -400 meter step-out target from Arrow Zone -preliminary results showing 90% increase to reported historic grade
 - o The Andrew South Zone historic drilling reported >30% pyrite. Target is a folding hinge in the iron formation.

Investment Highlights

PREMIER MINING JURISDICTION

Exploring mining-friendly New South Wales & Queensland, Australia

EXPLORING FOR COPPER & GOLD

Targeting Tier-1 Cu-Au porphyry deposits in NSW & high-grade orogenic lode gold deposits in Queensland

INNOVATIVE EXPLORATION STRATEGY

Aggressively drill testing previously un-drilled targets undercover

HIGHLY EXPERIENCED TEAM

Technically driven team of mine-finders with capital market expertise

100% PROJECT OWNERSHIP

District scale land positions – over 8,000 Km² of licenses in NSW

STRONG SHAREHOLDER BASE

Substantial ownership by management with strong institutional support

Large management and insider ownership – 31%

Strong institutional support – 25%

Our featured company is a technically driven copper-gold and gold focused mineral exploration company with projects in Australia. Inflection Resources is systematically drill testing a large portfolio of projects in New South Wales and in Queensland. Inflection is exploring for large copper-gold and gold deposits in the northern interpreted extension of the Macquarie Arc, part of the Lachlan Fold Belt in New South Wales. The Macquarie Arc is Australia's premier porphyry gold-copper province being host to Newcrest Mining's Cadia deposits, the CMOC Northparkes deposits and Evolution Mining's Cowal deposits plus numerous exploration prospects including Boda, the recent discovery made by Alkane Resources.

The Northern NSW Projects

Targeting large, undercover Cu-Au & Au deposits in the northern extension of the Macquarie Arc in NSW. Inflection is currently systematically drilling a large portfolio of targets, all 100% owned.

Why NSW & The Macquarie Arc?

- Australia's foremost Au & Au-Cu porphyry belt.
- Macquarie Arc in the Lachlan Fold Belt hosts several world-class mines.
- Northern extension of belt is covered by post-mineral sedimentary sequence.
- New South Wales has an exceptional mining culture.
- Massive quantity of quality pre-competitive geological data compiled by government of NSW and Geoscience Australia.

Dominant District-Scale Land Position

- Biggest owner of exploration tenements and applications in the Macquarie Arc.
- Over 8,000 km² of exploration licenses and applications. Licenses 100% owned.
- Highly-strategic, district-scale land position
- Many major mining companies actively exploring for Cu-Au in the belt.

The Carron Gold Project

Targeting high-grade orogenic lode gold veins along strike from the historic Croydon Goldfields in Queensland. The Company controls over 30 km of untested NW trending structures.

Croydon is one of Queensland's significant historic gold camps with >1Moz Au production with average grades of 35 g/t Au* widely reported.

Inflection has completed the following:

- 3,855-line km of 50 meter spaced airborne magnetics.
- 3D Magnetic Vector Inversion modelling.
- Constructed 3D geological model.
- Defined 25 initial drill targets.
- Completed 2 scout drill-holes

Work program:

- First-pass drilling on highest priority targets.

Ownership:

- Current 50% ownership. (JV with Oakland Gold Pty Ltd.)
- Option to earn up to 70% interest by investing AUD\$0.5M.
- Pathway to earn a 100% interest.

LOMIKO METALS®

Our featured company is focused on the exploration and development of flake graphite in Quebec for the new green economy.

Lomiko is a Canadian-listed junior graphite exploration and development company. It's flagship asset is the La Loutre graphite deposit, located in Quebec, Canada about 120 km northwest of Montreal and 53 km southeast of the currently operating Imerys Graphite and Carbon Timcal Lac des Iles graphite mine.

The La Loutre deposit currently has an NI 43-101 compliant resource estimate completed in 2016, with 4.1 M tonnes of 6.5% flake graphite in the indicated category and 6.2 M tonnes of 6.1% flake graphite in the inferred category based on a cut-off grade of 3% in a open pit.

Lomiko plans on updating their resource estimate soon, integrating drilling data from 2019 in the property's Refractory Zone which features some notable, relatively long and high grade intercepts that would expected to add tonnes and potentially improve the grade of the overall deposit.

Lomiko just completed the remainder of purchase and now owns 100% of the property

PJO

CORPORATE SPONSOR

Investment Highlights

- Proven Management with decades of experience in the Guiana Shield
- Tassawini Gold Project hosts an Historical Resource of 499,000 oz. (SRK, 2010) Non 43-101
- \$34M spent previously with mineralization open in several directions
- Licensed for mining
- Large influx of capital into the region for exploration and production
- Building a Guyana focused producer with exploration upside

Our featured company is a gold explorer and is currently in the process of acquiring the Tassawini Gold Project in Guyana.

The Tassawini Project

- 1381 hectares
- 120 person camp
- 650m commercial airstrip
- Tidal river capacity for 1,000 tonne barges
- ~100km to Atlantic Ocean

Deposit

- Medium Scale mining permits issued in 2018; renewable in 5 year cycles.
- Extensive historic Diamond and RC drilling since 2004:
 - 47,509 meters in 1,279 holes
- Metallurgical testing 73-97% , mostly in saprolite.
- Additional Regulatory Approvals: Only completion of EIS necessary for production.
- Full government backing. Historical Amerindian claims defeated in two court rulings in 2013 and 2017.
- Local government support includes setup of a local police station to protect land

Historical Resources (non 43-101)

- Indicated: 437K oz Gold
- Inferred: 62K oz Gold

Upside potential with structural, geological, geochemical and geophysical targets

Potential for MultiMillion Ounce Gold Endowment

The Harpy Property

- Project located in the prolific Guiana Shield of South America which contains over 110 MM oz Au inventory
- Adjacent to Guyana Goldfields producing over 220,000oz per year. Recently purchased by Zijin Mining for \$323 Million.
- Located on the Cuyuni River for ease of access, barging personnel, exploration and drilling equipment.
- Significant artisanal mining throughout the Company's property, identifying early exploration programs.
- 100% owned by Harpy with all exploration and environmental permits in hand.

The Aura Project

Project One's wholly owned Aura Property, is made up of 2,706 hectares of contiguous claims and is located approximately 150 kilometers east of Vancouver, British Columbia. It is close to two recently operated mines and several high profile exploration properties.

Noranda's historic work returned fifty-one (51) continuous 1.5 metre chip samples collected along the trend of the anomalous outcrop of quartz breccia that returned consistently anomalous levels of gold. The average over 76 metres was 514 ppb (or 0.514 g/t) gold, including a 13.5 metre section of 1034 ppb (or 1.034 g/t) gold.

Colonial Coal Presentation

Benz Mining Presentation

Eastmain Project Video

Benz Mining
Exploration Update
19 Page PDF
August 26th, 2021

Colonial Coal (CAD TSX-Venture) has gone from a low of .50 in June to closing on Friday at .94! I have the 52 week high at .95 (CX2 trade) which was the high on Dec. 18th, 2020. I actually bought some at .94 that day.

It is nice to see the stock finally challenging 52 week highs again but it is no where near the value of the metallurgical coal in the ground. Colonial Coal has 695Mt of Met Coal in the ground being valued at about US .20/t ??? When/if a bid comes in, there will be a big stock price adjustment in my opinion. The majority of Colonial Coal's stock is owned by 10 or less people/institutions and remember that David Austin previously sold Western Coal for \$3.2 Billion. It is not his first rodeo.

Steel is in demand and coking coal is used to make steel.
Coking coal global pricing is increasing almost daily.

CAD Chart by TradingView

Benz Mining (BZ TSX-Venture) recently put out an exploration update and news of a \$10 Million financing. The thing that amazed me the most was the financing was a flow-through financing and it was priced at \$1.10CA! The stock was at .61 when this was completed last week. Very bullish in my opinion and if I were to speculate, I would guess some big institution became a shareholder by way of the financing. Benz will be drilling for 12++ months and hopefully we can get a steady stream of assay results soon.

Last Tuesday Benz traded over a million shares with Haywood being the seller of 934,500 of them. Someone wanted out and their shares were bought, then the stock closed up .17 cents. Go have a look at their site, look at their exploration news, and view the videos.
